Annual Convention U.F.A. and U.F.W.A. Sedgewick Const.

The Annual Convention of the Sedgewick Provincial U.F.A. and U.F.W.A. was held in the K. P. Hall, Sedgewick, on July 7th, 1932. There was a good turnout from all parts of the constituency also a large delegation from the U. F. A. and U. F. W. A. Locals. A large number of resolutions were dealt with taking in a wide range of subjects. It was recommended to the Provincial Government that a scholarship to the University of Alberta be given to at least one outstanding pupil in each constituency. Nationalization of our Natural Resources was recommended and a resolution was passed asking the Provincial Government to close the Edmonton Normal School and keep the Camrose Normal open. The convention also recommended the Government reduce the Auto License and increase the Tax on Gasoline, also do away with the refund on commercially used Gasoline. The convention also went on record as being opposed to the export of wheat being dealt with at the coming Imperial Economic Conference.

Chas. P. Hayes, President of the association was elected chairman and conducted the business of the meeting in his usual diplomatic manner. J. E. Brown of Galt was elected director and was the first speaker and dealt briefly with our modern social problems and with the organization. Mrs. J. L. Zipperer of Loughheed, the U.F.W.A. Director spoke very effectively of the work of the U. F. W. A. A. G. Andrews, M.L.A. reviewed the work of the last session of the legislature in a very effective way and was given close attention by the audience. He stated that unquestionably state medicine was coming and that Normal School fees were to be increased from \$25.00 to \$50.00. There were to be no more loans to students. At the conclusion of his address, Mr. Andrews was tendered a hearty vote of confidence by the convention. L. D. Nesbitt head of the publicity department of the Alberta Wheat Pool gave an interesting and instructive talk which was well received by the audience. Gordon Foster, of Hand Hills, was present and thanked the people of this district for the large loads of vegetables that were donated to his constituency last fall. Mrs. Ed. Kehoe of Camrose who had won several prizes with her poultry in the Egg laying contest, gave a profitable talk on Poultry production. The number of questions asked indicated that considerable interest was taken in the subject.

The following Officers and Directors were elected: Chas. P. Hayes, President; Mrs. W. Hallam, 1st Vice President; W. N. Bates, 2nd Vice President. Mrs. Berge, R. W. Ash of Viking, I. Lewis, of Killam, Mrs. T. P. Remick of Alliance, Directors. Frank Grandage of Loughheed, Secretary. At the Public meeting in the evening the large hall was packed to hear W. T. Lucas, M. P., and the Hon. J. E. Brown, Premier of Alberta. Mr. Lucas spoke briefly stating that as it was not often the people had an opportunity of hearing the Premier he should be given as much time as possible. Mr. Brown, seemed at his best and spoke for nearly two hours to a most attentive audience. No one tired of listening to his detailed summary of the problems that have to be met by the Executive heads of the Province in times like the present. Mr. Brown dealt with a wide range

of subjects in a manner which showed that he had a complete grasp of the situation. He dealt in particular with our Capital debt or Bonded indebtedness, pointing out that the Province of Alberta is in a more sound financial position than any Province west of the great lakes. At the conclusion of his most interesting address a vote of confidence was passed in the Premier and his Government.—Contributed.

LOVE HOLDS MANY MEETINGS

J. R. Love, M.L.A. for the Wainwright Constituency is now on his annual tour of the Wainwright Constituency holding meetings at those points where people wish the same to be held. Meetings have already been held around the Irma district at Crescent Hill School, Carl Springs School, Albert School and Avonlea School. The meetings have been well attended and much interest has been shown in the problems facing governments during the abnormal period through which we are passing.

Mr. Love in addition to dealing with problems facing the Provincial government has devoted much time at these meetings in analysing causes of the depression and in pointing out what must be done before a return to better conditions can be expected.

Stabilization legislation, as now in force in many parts of the British Empire with respect to primary products, if passed in Canada would be the means of immediately raising the price levels of many of our primary products and thus hasten the restoration of purchasing power to our basic industry, Agriculture. Mr. Love also maintained that our entire credit system must be overhauled so as to function more in the interests of the common people.

In provincial affairs Mr. Love showed how municipal and provincial governments are at the mercy of the financial condition of the people. When people cannot pay the normal rate of taxation governments are in the same financial difficulties as are experienced by the people individually. Mr. Love reviewed the various items making up the provincial debt of the Province and claimed that no one had shown where any specific expenditure should not have been incurred. He also showed by an analysis of expenditures for public services excluding public debt charges, that Alberta is the only province in the Dominion of Canada where the per capita expenditure today is less than it was ten years ago.

To further substantiate the record of efficiency and economical government that Alberta has enjoyed since 1921, Mr. Love quoted from the reports of the Citizens' Research Council of Canada, which is a non political body of men engaged in the study of public finance. The report of this body made this spring indicated that the per capita expenditure for all purposes in Alberta since 1922 has increased by a smaller percentage than in any other province in Canada.

The Economic Conference and the need of freer trade between Canada and all countries to whom Canada might sell wheat were also dealt with by the speaker.

Mr. Love will continue holding meetings throughout the Wainwright constituency until August 13th. The Wainwright Constituency Convention will be held in Wainwright on Monday, August 8th at 10 A.M. The Hon. George Hoadley and Mrs. Hepburn, Vice-Pres. of the U. F. W. A. will be guest speakers at the convention.

NOTICE

TENDERS WANTED

Tenders will be received by the Village of Irma for the placing and spreading of 125 yards or more of gravel on the streets. Tenders to close at 6 P. M. on August 4th, 1932. Specifications and details at the office of the Secretary.

Lowest or any tender not necessarily accepted.

E. W. Carter, Secretary.

The British American Oil are offering their damaged tanks for sale by tender. These will make good granaries and will not doubt be secured by some of the Irma farmers. See advertisement in this issue.

Kinsella District

Mr. and Mrs. W. L. Ferrie's spent Sunday at Birch Lake.

Mr. and Mrs. Neale and son and Mr. Frank Williams and mother, Mrs. M. Williams, and Mrs. Garvie were at Innisfree on Sunday.

Miss Isabel Siroach has returned from visiting friends at Percy Lake. Mrs. Charles Arkinstall, Sr., spent a few days in Edmonton last week. Miss Elizabeth Beschall is spending her holidays at her home here.

Mr. Jack Allen spent a few days in Edmonton this week.

Mr. and Mrs. Bob Arkinstall and family and Miss Belle Arkinstall, all of Edmonton are visiting their parents Mr. and Mrs. Arkinstall.

Mr. and Mrs. F. Murray and daughter Alice are spending their holidays at Banff.

Mr. Markell and son of Winnipeg are in the district visiting stock.

Mr. and Mrs. Wadden and daughter and Mr. and Mrs. Nease and family spent Sunday at Hardisty Lake.

Mr. and Mrs. W. L. Ferrie and Mr. and Mrs. F. Murray; and Mr. and Mrs. Dickut and family attended the old timers picnic at Hardisty last Wednesday.

Mr. and Mrs. H. Austin and daughter also attended the old timers' picnic at Hardisty last Wednesday.

The annual picnic was held here on Thursday last and it was brought to a close with a dance at night.

Mrs. Turnbull's brother from Toronto is visiting her at her home north west of town.

CANADIAN LEGION PICNIC

The annual picnic held by the local Branch of the Legion was held on July 27th and was enjoyed by all present. Benny McGuire was successful in catching the greasy pig, after a long hot chase, so here's wishing Benny success in his hog ranch. Numerous races were held, the man proving himself to be the best in the relay race, and the married ladies proved too heavy for the single ones in the ladies tug-o-war, a well pulled struggle, but the single men beat the married. The Irma ladies soft ball team beat the Canadian Legion, but the boys say they are going to train and reverse the result next year; maybe they will (smile). The Legion's thanks are extended to all who helped to make this picnic a success, especially to Percy Jones and the genial Jack Levitt, for the use of truck and transportation of supplies.

On Wednesday morning the 27th fifteen Irma boys journeyed to Camp Lake, where they will spend a week of outdoor life at the Viking District Boys Camp. Here they will meet other boys from various points and join in swimming, sports and all the other enjoyments to be had at a camp. The camp is to be led by Geo. D. Young, B. A. of McDougall Church, Edmonton, and there will be professional teachers in sports and studies.

The following boys make up Irma's contribution to the camp: Marvin Levitt, Archie Levitt, F. Thorke, B. Charter, A. Glasgow, Ray Locke, A. Knudson, R. Schoner, P. Beings, R. Latner, N. Latner, G. Larson, C. Larson, R. Congdon, S. Congdon.

IRMA BRANCH NO. 112

CANADIAN LEGION B.E.L.

A general meeting will be held on August 8th in Hedley's Hall at 8 p.m. when the delegates report will be given. This meeting will be followed by a social evening.

RE INITIAL PAYMENT 1932 POOL

Wheat growers who desire to place any wheat in the 1932-33 pool are advised that the amount of the initial payment has not as yet been determined and it will probably be another month before the figure can be definitely set. In the meantime wheat will be accepted for pooling on storage tickets, either special binned or graded, issued to the grower. Whenever the initial payment is definitely fixed cheques will be sent out for the settlement which have been held up during the interval. Any storage charges will be absorbed by the Pool from July 16th until the date the initial payment is established on wheat held for pooling under definite arrangements, provided the head office has been advised by the shipper or elevator agent immediately following receipt of any such wheat for storage.

Under no other conditions will such storage charges be absorbed.

Big Gasser Added to Supply for Edmonton

New Well is 13 Miles Southwest of Big Daluth Well.

Gives 21 Producing Wells in Viking and Kinsella Fields

The important gas strike made by the Northwestern Utilities, Ltd., in the Kinsella field shows that Edmonton has as large a reserve there as in the Viking area, it is reported.

Drilling at Harvey No. 1 well in the Kinsella field, the company has brought in a producer which has a flow of 7,000,000 cubic feet per day.

With this new well on the line, the company will have 24 producing wells in the Viking and Kinsella fields with a daily open flow capacity of 122,600,000 cubic feet.

First in 1932 Program

The new Harvey No. 1 well is the first drilled by the company in the Kinsella field under the program to be carried out in 1932. Steps will be taken at once to move the plant to Harvey No. 2 well in the same district where drilling will commence at once.

states Julian Garrett, manager of the gas company.

Expressing satisfaction over the results of drilling the first well of the company's in the Kinsella field, Mr.

Garrett said the flow was 50 per cent higher than the average in the Viking field.

The new producer is some 13 miles southwest of the big Daluth well, with a flow of 25,000,000 cubic feet, which was brought in some years ago.

Structure is similar

It appeared from this fact that the Kinsella gas field was fully as extensive as the Viking area, said Mr. Garrett. The reports from S. E. Slipper, geologist for the company, showed that the structure at the new well was similar to that in the Viking field, and different in several respects to the log of the Daluth well.

The location of Harvey No. 1 is on legal subdivision 1, section 17, township 47, range 11. According to the reports from drillers, the producing sand was struck at a depth of 2,148 feet where 8-inch casing was set.

As the bit penetrated the sand, the gas flow increased slowly and at 2,169 feet it was 4,000,000 cubic feet. Drilling was continued to a depth of 2,173 feet, where the flow was found to be 7,000,000 cubic feet a day. At a depth of four and a half feet lower still, the flow was unchanged, so the well was considered completed and the drill withdrawn.

SENIOR ROOM PROMOTIONS IRMA PUBLIC SCHOOL

Following is a list of promotions for the term ending June 30th, for Senior Room Irma Public School. Names in order of merit:

Grade VIII.—Aetha Knudson 90.66 per cent; Wm. Milburn 87, Ralph Congdon 84.10, Eileen Gieson 82.22, Albert Glasgow 77.31, Ina Mathison 76.88, Benny Maguire 73.33.

Grade VII.—Archie Levitt 88.62, Roy Blade 88.62, Fern Simson 72.50, Fred Thorton 71.22, Robt. Gultner 69.12, Elsie Robertson 64.62, Donald Olson 58, Mary Miles 51.12.

Grade VI.—Robert Charter 85, Mildred Hill 85.28, Ethel Tate 81.56, Fred Knudson 78.57, Clarence Carter 77.57, Ross Sharkey 65.71, Lewis Jones 64.27, Gunnar Larson 63.42, Jas. Sharkey 62.85.

Grade V.—Elbert Levitt 81.62, Arthur Peterson 71.97, Harry Launer 70.75, Louise Berber 70.02, Clifford Jones 64.25, Percy Congdon 64.25, Elton Herbert 60.87, Ethel Arnold 60.50, Gladys Gieson 60.05, Harvey Gultner 56.12, Ronald Thorton 54.62, Clarence Larson 44.37, Leslie Larson 42.30.

Florence McDowell, Principal.

AN 8-CENT COW

The Barrehead News tells the following incident:

Chas. Boehler shipped a cow to the Edmonton stockyards, and transaction resulted as follows: The weight 860 pounds; price 75c per hundred pounds; value of cow \$64.50. But Mr. Boehler did not get a cheque for \$64.50. There were deductions as follows: Insurance 30c; stockyard 75c; brand reading 10c; commission 90c; trucking \$43.00; exchange on cheque 15c, making a total of \$62.78 which subtracted from \$64.50 left 1.72, the full amount received for the cow.

A RAIL TESTING CAR (From The Viking News)

On Friday last a unique car visited Viking. Equipped with many instruments and electrical apparatus, this car moves over the lines of the Canadian National Railways peering into the interior of every rail. It looks for flaws, those inside breaks or imperfections which under extreme strain cause accidents. It is another triumph of modern science, a marvel indeed. Slowly at but six miles per hour, it contacts every foot of rail and notifies the operators when a defect is found. A step is made and the spot clearly marked with yellow paint, while the rail is x-rayed to prove the defect and show a nature. A new rail will replace the old and greater safety is assured. Only one rail was thus found between Wainwright and here, though, some 20 were located on a stretch east of Biggar. Naturally this is a very expensive car, costing some \$25,000 per hour to operate. But the results justify the large outlay.

JARROW

Born on July 21st, to Mr. and Mrs. T. A. O'Neill of Jarrow, a son.

Market Review

BEEF—Quite a few medium and plain grassers on the Edmonton market this week, with a resultant slowing up of trade. Good butchers still find a ready demand. Choice heavy steers \$4.50@4.75; choice light \$4.75 @85; good \$4.50@4.75; medium \$3.75@4.25, and common \$2@3.50.

FEEDERS, STOCKERS—Offering on the plain order and demand only fair. Feeder steers \$2.75@3.25; stock steers \$2@3.25; stock heifers from \$2@3.25, and stock cows \$1.50@2.50.

HOGS—Edmonton quotations easier on hams, fed and watered, sales being made at \$3.40@3.60; select went at \$3.90@4.10, and butchers \$2.90@3.10.

SHEEP—At Edmonton yearlings brought \$2.50@3, with ewes selling at \$1@2, and lambs \$2@4.50.

GRAIN—Winnipeg prices worked up over 1 cent this week. Strength at Liverpool and Chicago, aided by harvesting conditions in foreign countries, caused the upward swing of the market. Weather conditions have been good for the growing crops in Alberta during the past week, although considerable hail reported.

EGGS—Prices steady. Extras, 10@12; firsts, 8@10; seconds, 5@7c.

HAY—Prices steady with demand light. Upland \$9@10; timothy \$10@13 per ton at country points; upland at Calgary loose hay market bringing \$12 per ton; either baled or loose.

FEED OATS—Market quiet, with offerings only arriving as required. Price remains steady at 25c per bushel, delivered.

WAINWRIGHT

Myers and Sons of Wainwright are putting on a Stampede at the Fairway Stampede Grounds near Firth on August 2nd and 3rd.

Carrying an armful of implements for his summer home at "Pigeon Lake, Alta.", Mr. Smith was within a yard of his automobile when stricken. A doctor was called immediately by a neighbor but the minister died in a few minutes. He had suffered angina pectoris for some years and the doctor declared excitement, caused by haste in his departure for his summer home, caused a stroke.

Ten Years in Office

Vernor Winfield Smith's death concludes 11 years of active participation in Alberta politics for, before the coming of the Brownlee government he was Minister of Railways and Telephones under Herbert Greenfield.

These are All Evening Meetings

Saturday, July 30.—Horse Valley Local Tuesday, Aug. 2.—Greenhills Local Monday, Aug. 8.—Convention. Tuesday, Aug. 9.—Leaholme Local Wed. Aug. 10.—Edinlass Local Thursday, Aug. 11.—Killarney Local Friday, Aug. 12.—Doloy Local Saturday, Aug. 13.—Browning Local

These meetings are open to the public and you are urged to attend and hear what your member has to say.

SECOND HAND BINDERS

FOR SALE

Second hand Binders for sale cheap. We have one 8 ft. Massey Harris for \$35.00 which will do lots of cutting yet. —V. Hutchinson, Massey-Harris Agent, Irma.

TENDERS WANTED

Tenders will be received up till August 5th, for fencing yard at Crescent Hill School, material will be furnished by School Board.

Wm. T. Steele, Sec.-Treas. 26-27C. Irma, Alta.

FARM LANDS FOR SALE

N.W. 2-44-9 with 161 Acres. S. E. 2-44-9 with 162 Acres. Fr. N.E. 20-44-9 with 140 Acres. N.W. 30-46-9 with 150 Acres.

The above described property for sale on terms at reasonable prices free from all encumbrances. Write or enquire of the Municipal District of Battle River No. 423 at their regular meeting being the second Thursday in each month.

Municipal District of Battle River No. 423, Irma, Alta., Registered Owners.

N. W. 6-45-7 160 Acres offers will be received for the purchase of same on terms subject to the approval of the Minister of Municipal Affairs.

FOR SALE—One Massey Harris 8 ft. Blinder in good condition.—Mrs. E. C. Elliott, Phone 110. 27-c.

Mr. A. Dupre has been appointed Ford Agent at Wainwright.

The 40th Anniversary of

"SALADA" TEA

Finest quality for 40 years has built the largest sales in North America.

Ourselves.

Bruce Barton, the well known author and magazine writer, has proposed the toast: "To the only folks who can make us or break us—Ourselves." And he quotes the saying of Carlyle: "The world's being saved will not save us; nor the world's being lost destroy us. We should look to ourselves."

The truth of these statements, differently worded but meaning exactly the same thing, cannot be gainsaid. The biggest factor in the world now, as always, is the individual. No man is actually down, out, defeated, unless and until he himself admits defeat. Furthermore, more people are destroyed by prosperity than by adversity; more people fail to grasp and enjoy the realities of life when the gods are showering them with riches or other gifts than when they are faced with difficulties and confronted with seemingly unsolvable problems.

It is then people begin to call upon latent powers they possess. William James, in his essay on "Vital Reserves," pointed out that underneath our daily store of strength and courage, all of us have reservoirs that are tapped only by emergency. We are all able, under the test, to surprise ourselves with an unsuspected capacity to be and do more.

It is that capacity which is our greatest asset. It is our hope in the present and for the future. It is ours to employ now.

The writer is acquainted with a man resident in one of our prairie cities who lost his position over a year ago. He has a bed-ridden wife not only to support but to care for. He is not an educated man, and prior to losing his position received only a small salary. Did he despair and call upon the Government to put him "on relief"? Not a bit of it! He called upon his own reserves of strength. Although he had no experience, he got a job painting a garage. This led to other small painting jobs. Then at Christmas time he got work soliciting orders on commission basis. When spring came he hunted up garden work to do. This he keeps going. He is seldom idle because he is willing to take on any kind of a job, no matter how humble. And when you meet him he always has a new joke to tell. He goes whistling on his way, according to accept Government or municipal relief, always looking forward to better days that must inevitably come, and in the meantime keeping his head well above water. He is a bigger, better man than ever before; has maintained his self-respect and kept his courage, and, in the days to come, will command a better position than any he might have secured had "hard times" not descended upon him.

This is a very simple illustration of a very ordinary individual. Nevertheless he has and is displaying the spirit of a hero. Yet he possesses nothing that each and every person has not got, namely, a reserve of strength, of courage, of determination, to call upon in times of emergency. But the important thing is—he called those reserves into action. Too many of us fail to do this. We hesitate, we drift, we refuse to use the powers lying latent in us with which we have been endowed. In a word, we have not faith in ourselves, and without that faith anything that others may do for us will fall far short. Such people will come out of the present time of difficulty weaker and less well equipped to take advantage of the opportunities which the future will offer to us.

Let us put ourselves to the test. We have been buffeted about; we may be gasping, but if we are strong of heart and keep on we will get our "second wind." A race is never lost until it is over; we always have a chance to win until the tape at the finishing line is definitely broken. Our success or failure depends, not on the other fellow, but on ourselves.

Fast Ocean Travel

Canada Now Only Week-End Journey From England

Canada is now only a "week-end's journey from England," thanks to the record-breaking crossings of the Atlantic by the C.P.'s "Empress of Britain," says Viscount Rothermere, famous British newspaper magnate. Viscount Rothermere declares that the interval between the time the "Empress of Britain," passed Bishop's Rock lighthouse, off the Scilly Islands, and the time she reached the entrance to the Strait of Belle Isle, was only 73 hours and 53 minutes. "The passage of the north Atlantic was made with only two nights spent out of sight of land," declared Viscount Rothermere's message, "after which the rest of the journey has been through smooth land-locked waters."

An Imposing Monument

Prince Of Wales Will Dedicate War Memorial In France

One of the most imposing war memorials on French soil is that which is to be dedicated by the Prince of Wales at Thiepval, on the Somme, next March. This monument, which is nearing completion, will be composed of triumphal arches 140 feet high, and only five feet less in breadth. On the pillars will appear the engraved names of 73,367 British officers, N.C.O.'s and men.

The average annual income of physicians in the United States, as revealed by an American Medical Association survey, is \$9,974.

Had Riel For Customer

Ontario Barber Has Followed Trade For Seventy-Six Years

Louis B. Lafrance, the oldest active barber in the Dominion, celebrated his nineteenth birthday in June. He has been engaged in the trade seventy-six years, and hopes to be able to continue for another ten or fifteen, he says. He was born in Quebec city, moving to Montreal, where he learned the trade. He then went West and opened a shop in Winnipeg, which at that time was little more than a village. One of his customers was Louis Riel, the leader of the Northwest Rebellion. Mr. Lafrance and Riel became friends, and he still thinks Louis was a very good man. He was in Winnipeg when Sir John Macdonald went out there to the dedication of Winnipeg as a town. Coming East some fifty years ago, he settled in Trenton, where he has kept shop ever since. He is the father of nineteen children.

Right Up-To-Date

The new one-franc piece which France is coining shows how modern that country is. "Marianne," as the girl on the coin is called has been given a bob. Until this year she had long hair.

It is said that more persons disappear from Paris than from any other city in the world. About 520 were reported missing every day in 1931.

Modern conveniences are being introduced into small towns of Albania.

All Her Children Were Troubled With Diarrhoea

"Mr. J. J. Bickert, R.R. 1, Enderby, B.C., writes:—'Last summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly.'"

Established For Centuries

History Of Many English Business Firms Is Interesting

Among the historic business firms of England is one which claims existence when the famous demolished mediæval London. This is Hedges and Butler, wine merchants, whose original lease forbade the shooting of snipe in that thoroughfare and who numbered Pitt, the Duke of Wellington, W. E. Gladstone, and Lord Beaconsfield among their customers. Yet another is G. W. Scott and Sons Limited, who made hoops for the dresses of the fashionable ladies in the days of Queen Anne and wicker frames for the berkskins of the Guards at Waterloo. Founded in 1690, Birch and Co., have since provided all the banquets for the City Corporation, and for 250 years have fed every crowned head and important man in Europe. The business remains famous for turtle soup and punch made from age-old recipes, and the fine window of their original shop now reposes in the London Museum. Also founded in 1690, Grosvenor, Chater and Co., were the first stationers to the Bank of England. Queen Anne, a famous gourmet, liked the relishes made by Croshaw and Blackwell, into which firm Napoleon's chief, Quailotti, entered, and invented the pickle, Piccalilli. In 1783, it is interesting to note now that the tea duty in England has just been reimposed. Mr. Richard Twining, of R. Twining and Co., the tea merchants, was called in by Pitt to discuss the removal of the tea tax, a step which was taken. Two hundred and twenty-two years ago the Sun Insurance Office began business, and in 10 years issued 20,000 policies, insuring about £10,000,000, an enormous sum in those days. Telescopes made by early Dolonds of Dolond and Alchison, were used by Nelson, Wellington and Napoleon. To C. T. Brock and Co., the firework manufacturers, belongs the distinction of carrying on an illegal trade for 155 years, firework making not being actually legalized till 1875.

High Tariff Walls

Action Of U.S. Proves a Severe Blow To Canadian Agriculture

The exports from Canada to the United States of principal commodities, such as wheat, corn, and other farm products, during the month of May amounted in value to \$590,195, as compared with \$3,237,340 in May, 1930, and \$3,604,898 in May, 1921, according to the Dominion Bureau of Statistics.

The high tariff walls erected by the United States, culminating in the Hawley-Smoot tariff in June, 1930, were a severe blow to Canadian agriculture, making the export to that country of many commodities practically impossible.

During the eleven months ending May, 1932, the export of such commodities to the United States totalled \$8,632,428, as compared with \$44,073,930 in the same period of 1929-30, and \$171,492,982 in the eleven months ending May, 1921.

With a duty of 42 cents per bushel on wheat, the export of Canada's chief agricultural product to the United States declined from \$101,050,120 in eleven months of the crop year 1920-21, to \$2,490,774 in 1931-32. Three cents per pound on beef cattle has caused a drop from \$21,182,824 to \$617,745.

Three dollars per head on sheep brought the export down from \$1,665,213 to \$823. Later at 14 cents per pound fall from \$2,380,221 to \$145,946, flaxseed at 65 cents per bushel from \$4,763,311 to \$573,709, potatoes at 75 cents per 100 pounds from \$6,557,031 in eleven months of 1929-30 to \$459,449, hay at 50 cents from \$2,369,295 to \$115,979, etc. Of course, lowered prices have also had some effect upon the values.

Internally and Externally It Is Good.

The crowning property of Dr. Thomas' Eclectic Oil is that it can be used internally for many complaints, as well as externally. For sore throat, croup, whooping cough, pains in the chest, cold and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Evidently Not Known

The case came before a London coroner the other day of a man who "with an income of nearly £3,000 a year, had not a friend in the world." It cannot have been generally known that he had an income of nearly £3,000 a year.

And now it is reported crocodiles do not cry. Next thing we know someone will muster enough courage to declare there is no such thing as a weeping willow.

Food loses no nutritional value in canning, scientific experiments indicate.

Using 'Planes In Stampede

Wild Horses To Be Rounded Up From Air

Klamath Falls, Ore., plans the mightiest wild horse drive—from the air. Three airplanes will dip low over the plateaus and passes, set the wild bands running, head them at the turns and finally stampede 2,000 of them it is expected, into a gigantic trap corral in the lowlands. The finest stallions and mares, it is promised, will be allowed to escape again to the hills, but most of that vast catch will be slaughtered—for chicken feed. The automobile could replace the horse in man's heart, but not even the auto could chase him off the map. Only thunder-birds swooping down from the sky can bring extermination to those wise, fleet, liberty-loving mustangs. Send them into your poetry bait.—Christian Science Monitor.

Muskeg Has Its Use

Possibility It May Be Manufactured Into Wall Board

Muskeg, the moss-like substance that covers thousands of miles of Canada's treeless north country, has at last found a use. An inquiry recently received by the Board of Trade at The Pas, Manitoba, may lead to a trainload of muskeg being shipped to Brampton, Ontario, for use in the manufacture of wall board.

Sitting in the midst of millions of tons of muskeg, long believed valueless, officials of the board were amazed when they received the letter asking about the possibility of buying muskeg. The board has agreed to be now under way for shipment and the Board of Trade is looking into the possibility of getting a factory to locate there and use the material.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief, inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful sufferers, there would be a package in your home tonight. Try it.

Treachorous Police Dogs

Bringing These Animals Into Canada Looks Like Mistake

The Stratford Beacon-Herald in connection with a case of a dog of six being bitten in Toronto by a police dog, observes that breeders of dogs are agreed that it was a mistake to bring this dog to Canada. It has not the background and tradition of the Collie, the bulldog, the St. Bernard, Newfoundland or any of the other well-known breeds of dogs to which we are accustomed. The police dog is a wild animal, and treacherous in the sense that he cannot be trusted not to take a bite at any moment. The breeding of these dogs should be discouraged, especially for city life.

The Man Who Walks

Cannot Afford To Relax Vigilance For a Moment

It must be admitted that the pedestrian today has a grievance. He must go about his lawful occupations, if society is to exist, and to do that he must frequent the streets and roads. Yet he is nowadays condemned to do so at the peril of being killed or maimed if he should be guilty of one error of judgment or one lapse of vigilance. He must live in a jeopardy comparable to that of the troops in the front-line trenches during the War.—Morning Post, London, Eng., London, England.

Douglas' Egyptian Liniment always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

Two poems and a complete story, including altogether 8,100 words, have just been written on the two sides of an ordinary postcard. This record feat was performed by a resident of Munich, Germany.

It cost nearly \$12,000,000 to supply London with water in the last 12 months.

Sick from Heat

"Baby's Own Tablets are excellent for children's summer complaints," writes Mrs. M. E. Conron, Branford, Ont. "Best of children's remedies for summer complaints," writes Mrs. Geo. Walker, Thomasburg, Ontario. "For fever, colic, constipation, Pleasant as candy—and absolutely SAFE. 25c a package."

Dr. Williams' BABY'S OWN TABLETS

Your Children

will thrive on Christie's pure Arrowroots

For the tiniest babies... for older children... for growing boys and girls... there is nothing more delicious and nourishing than Christie's Arrowroots. No substitute is good enough.

Christie's Arrowroots

Miracle Recorded In Church

Mosaic Panel Depicts Basket Of Bread And Two Fishes

A fourth-century church, built during the reign of the Emperor Constantine the Great, has been uncovered near Tiberias, on the way to Capernaum. This church commemorates the miracle of the loaves and fishes, performed by Jesus on the shores of the Sea of Galilee, and the actual stone said to have figured in the Gospel narrative as the boulder on which He stood has also been found in the centre of the church, where it presumably lay beneath an altar. Behind the stone a wonderfully designed mosaic panel was found, depicting in vivid black, red and yellow a basket, several loaves of bread, and two fishes. Although buried beneath dust and rubble for about 1,600 years, and only a stone's throw from the sea, the mosaic shows no signs of erosion, and the colors are well preserved.

Good Service For Citizens

Toronto Health Department Furnishes Tablets To Purify Water

A notice published in Toronto papers says that free tablets for the purification of water can be obtained from the city health department by any citizen. These tablets are recommended for those going on picnic or on camping trips where there are chances of having to use water of questionable purity. The tablets will purify water and make it fit for drinking in a few minutes.

That is a useful service for any city to give its people. People who go away and who use water of which they know nothing at all are running risks, and a tablet which will eliminate this risk is a friendly thing and a good travelling companion.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Game Fish In North

Transferring Speckled Trout Along Hudson Bay Railway Line

There is a possibility that game fish of the speckled trout variety, will be transported from the streams along the Hudson Bay Railway to the Clearwater Lake summer resort and other adjacent waters by airplane or tank cars, so the lakes may be stocked for sportsmen.

E. H. Stevenson, inspector of fishing, who is in Churchill, is at present engaged in making a survey of the brook trout line. It is his intention to pick out suitable places for the capture and keeping of fish until transferred to other waters.

Reducing Coffee Surplus

Slightly more than 263,000 sacks of coffee were destroyed by the Brazilian government in a recent week. This brings the total destroyed since policy of reducing the surplus production was adopted to 7,738,386 sacks.

With good management there is still money in farming. Fifty years ago an Ontario farmer paid \$500 for a farm and last week he sold it to a golf syndicate for \$550.

Schoolboy's essay: "The defendant's lawyer made a motion for a change of menu."

New Association Has

Been Granted Charter

Body Organized in Ontario For Protection Of Pedestrians

Did you ever jump for your life as a big hulking brute of an automobile driver bore down on you and when he honked derisively, did you ever mutter: "Their ought to be a law?"

Well, someone else did. Hence is born the Pedestrians Rights Association of Ontario, granted a charter by the Ontario Government.

Wary of the spectacle of seeing their fellow humans one moment pedestrians and the next cherubim, a group of citizens has founded the association. Head office will be in Ottawa, and the object to protect pedestrians "from all kinds of traffic injuries on streets and roads, especially those arising from motor and other vehicles, and from faults, abuses and infractions of the law by their drivers and owners." It has not been announced just how the pedestrians are to be protected.

British Exhibits Are

Coming Via Churchill

Directorate Of Grain Show Learns Plans Being Worked Out

Exhibits of British manufactured goods to be shown at Regina next year during the World's Grain Exhibition and Conference, and Regina exhibition will arrive via Churchill. Plans with this object in view are being worked out, members of the directorate board of the Regina Exhibition Association have learned.

A special committee representative of the exhibition association, the city council, the board of trade and the World's Grain Exhibition is at work making plans for the British trade exhibit and have received gratifying response from British manufacturers with whom they are in touch. The exhibit will be housed in the present Confederation Building.

The Smiths Still Lead

Numerical Supremacy Still Maintained By People Of This Name

The most prominent family in the United States apparently maintains its numerical supremacy in about all departments of human activity. Not only does it use more telephones, but it holds more public offices, according to recently published evidence. In the second edition of "Who's Who in Government," which has just appeared with biographical data on more than nineteen thousand public office holders in the United States, the Smith family is the largest on the public payroll.—The Journal, Providence.

Increased Resort To London Of Canadian Borrowers Shows New Financial Trend

Successful flotation of two provincial bond issues in the London market is accepted by New York bankers as a forerunner of increased resort by Canadian borrowers to the London new issues market "during the current period of financial strain and unsettled exchanges," says the New York Herald-Tribune.

The paper refers to the placing of British Columbia's £1,500,000 of 5s issue in London in May, which was quickly oversubscribed at 99, and of £1,000,000 Alberta 5s recently at 98½.

"The new trend," says the paper, "is somewhat of a tribute to the London new issues market, which recovered its poise last December."

"It remains the opinion of almost all competent authorities that the Canadian dollar will be eventually re-established on a parity with that of the United States, notwithstanding the present discount of nearly 13 per cent. on Montreal funds in New York. The close inter-relationships of United States and Canadian business interests, and the large aggregate of Canadian gold bonds, held in this country, are considered ample assurance of eventual exchange parity. Nor is it thought that such parity will be difficult to achieve or maintain in a normal world."

"It is accepted here that the Canadian borrowing in London has the tacit approval of the highest banking authorities in England."

This assumption is justified, since the effect on the exchanges accords with impressions prevalent here in regard to London financial policy. All exchange transactions between Montreal and London are mediated by New York. Canadian borrowing in London means, therefore, that additional pressure will be exerted to depress the British currency unit in terms of the United States dollar, while a favorable effect will be exerted on the Canadian unit in terms of the dollar.

"That London is averse to any substantial rise in sterling has been shown by the establishment of the stabilization fund. The effect of Canadian borrowing in London coincides with the operation of that fund, and it is therefore assumed that encouragement will be given the flotation of Canadian bond issues in London."

Sounds Reasonable

Establishing City Man On Farm Might Not Pay

A prominent citizen of Pennsylvania, realizing that unemployed city workers have no means to establish homesteads in the country, proposes that the State should finance them in the purchase of farms, stocking them with horses, cows, chickens and pigs, and supplying them with tools and seed. That kind of aid might be welcome to a genuine "back-to-the-lander" who had been brought up in the country, but how can it benefit the man who has never known of life outside a city? He couldn't tell a couldn't tell a horse's crupper from its headstall, he is helpless when he seats himself on a milking-stool at a cow's flank, he has the vaguest idea or none at all as to the proper feeding and care of swine. Even the comparatively simple procedure of keeping a flock of poultry in good fettle is Greek to him. You might as well bring a discouraged farmer to the city and expect him to make a success of running a beauty-parlor or a high-class specialty shop.

Exports of beef from Alberta in 1931 totalled 100,000,000 pounds, according to the annual report of the Provincial Livestock Commissioner.

The United States imported 284,000 pounds of garlic last year.

"I believe all men are stupid."
"Oh, no. Some remain bachelors!"
—Buen Humor, Madrid.

To Protect Industry

Ask For Stiffening Of "Empire-Content" Regulations in Britain
British Conservatives want a stiffening of the "Empire-Content" regulations which stipulate the percentage of Empire labor or materials that must be contained in goods entering under the Imperial preferences.

The central council of the National Union of Conservative Associations, meeting in London, with 500 delegates present, unanimously passed a resolution demanding the government take steps to amend the regulations, which at present call for an Empire content of 25 per cent.

The resolution complained that at present United States manufacturers are able to use Canada and the Irish Free State as corridors for the export into Britain of goods mainly of United States origin, thus evading the general duties and defeating the object for which they were imposed.

American Railways Hard Hit

Net Loss Of 76 Millions In First Four Months Of Year

A net loss of \$76,489,492 during the first four months of the current year was shown in the net income of the principal Class I steam railways of the country, according to a tabulation of the Interstate Commerce commission based on reports of 104 Class I steam railways. This compares with a net income of \$959,610 for the corresponding period of last year.

The net loss for April amounted to 20,682,727 compared with a net income of \$2,623,005 for that month in 1931.

A CHARMING LITTLE MODEL
THIS! YOUNG, DAINTY AND VERSATILE

It can be carried out in a great many different fabrics. It all depends upon whether young daughter wishes to wear it for parties, "best" or everyday occasions.

For parties, taffeta, crepe de chine or chiffon is darling in pale blue, pink or daffodil yellow.

For simple "best," a crepe de chine print in light navy blue and white is cute idea as sketched. The yoke that merges into capelet sleeves in plain navy crepe. It's most practical.

Style No. 290 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 1½ yards of 35-inch material with ½ yard of 35-inch contrasting. Red and white polka-dotted dimity with plain white, Nile green, linen with yellow and orchid and white checked tissue gingham with plain orchid gingham are striking combinations, truly French.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

GEORGE E. CARTER WINS PROMOTION

Succeeds George A. Walton
as General Passenger
Agent C.P.R.

George E. Carter, Assistant General Passenger Agent, Canadian Pacific Railway is appointed General Passenger Agent Eastern Lines, with headquarters at Montreal, effective July 1st, according to an announcement by R. G. McNeillie, Assistant Passenger Traffic Manager. He succeeds the late George A. Walton, who died on the "Empress of Australia," at sea, on May 18. The position of Assistant General Passenger Agent now held by Mr. Carter will not be filled. This decision was reached in view of the need of economy during current business conditions, and reduces the number of Assistant General Passenger Agents to two.

GEORGE E. CARTER

Mr. Carter entered the service of the Comptroller in the Passenger Department at Saint John, N.B., on September 28, 1914. Shortly thereafter he enlisted for Overseas Service, and was wounded on the Western front with the first Canadian Machine Gun Battalion. He subsequently became a member of the world famous Princess Patricia's, the character of his service with that unit winning him a commission in the Imperial Army, from which he afterwards transferred to the Canadian Corps.

Returning from Overseas at the close of the War, he re-entered the Passenger Department of the Canadian Pacific at Saint John, N.B., and steadily worked his way upward through the ranks. He was transferred to posts of increasing responsibility at Quebec, and in turn was made Chief Clerk in the New York and Montreal offices of the Passenger Department. Mr. Carter also made a special instructional trip to Europe in co-operation with the Canadian Pacific Steamships.

He was made District Passenger Agent at Saint John on December 10, 1928, and Assistant General Passenger Agent in Montreal on May 1st, 1930. He is a member of the Traffic Club of Montreal, and of the Kiwanis Club.

Had the Makings

The tourist rushed into the village shop. "I want a quart of oil, some petrol, a coupon for the new five-gallon paraffin can, and four pie tins."

"All right," replied the enterprising clerk, "and you can assemble 'er in the back room if you want to."

Tony Sarg, artist and puppet-master, lived as a boy in an English village which had no toy shop or store that sold gimcracks. The situation forced Sarg to make his own.

CANADIAN-UNITED STATES PEACE PARK DEDICATED

These photographs were taken when the Waterton-Glacier International Peace Park was dedicated under authority of the Canadian Government and United States Congress as a monument to 117 years of enduring peace and good-will between the two nations. Sir Charles A. Mander of England delivered the dedicatory address at the colorful ceremony and he is seen at the top, center, clasping hands of E. T. Scoyoon (left), superintendent of Glacier National Park, and H. Knight (right), superintendent of Waterton Lakes National Park. The Peace park idea originated with the Rotary Club of Cardston, Alberta, and was sponsored by the Rotary Club of Canada and the United States. The lower photograph shows Chief Two Guns White Calf adopting Lady Mander into the Blackfoot tribe as Princess Shining Star Woman (Ko-Shi-Ki-Na-Su-Ya-Kee), following the ceremonies of dedication.

Weed Menace

Effective Method Of Securing a Clear Seed Crop

This is the time of the year when the rogues of the seed crop should be carefully watched—among the most troublesome of which are the weeds Bladder Champion, Catch Fly, Couch Grass, Rib Grass, Ragweed, Ox-eye Daisy and Perennial Sow Thistle—and only by effective policing methods can the best quality of seed crop be secured. As the Dominion Seed Branch points out, growers should police their fields carefully and be prepared to resort to liberal roguing where necessary in order to ensure that their seed crop will be free from impurities which too often render otherwise good seed of no market value whatever. Roguing, or pulling weeds by hand, before they have gone to seed, is the most effective method of making sure of securing a clean seed crop.

Expedition Into North

May Attempt To Locate Rich Gold and Silver Properties

Captain James C. Critchell-Bullock, of Vancouver, companion of the late John Hornby during his wanderings in the sub-Arctic barrens of the North West Territories, may lead an expedition into the north in an attempt to locate rich gold, silver and radium properties.

"Hornby was the original discoverer of the Great Bear Lake radium area," Critchell-Bullock declares.

"During his wanderings in the barrens he made many other important discoveries, and before he died he turned over to me most of his samples, his diaries and his maps."

One of these samples, assayed recently in Vancouver, shows values of \$138,000 to the ton in free gold, Captain Critchell-Bullock said.

Prepared For Emergency

Grave Ready For Lighthouse Keeper Taking Up Duties in Bahamas

When a lighthouse keeper takes up his duties in the lighthouse of one of the far-flung Bahamas, he finds a grave of solid rock awaiting him. He knows that the "light" is all-important and another keeper could not take time off to dig him a grave. He also knows that because of the heat he will inhabit his final rock-hewn dwelling before sundown in the day he dies.

This novel "death insurance" scheme was explained in an interview by Mr. M. S. Rogers, resident engineer of the Imperial Lighthouse Service, on furfurlough in Canada. He is in charge of the 12 Imperial Government lighthouses of the Bahamas.

A Berlin inventor has perfected a projector for throwing advertisements on mountain sides.

The United States and China produce the largest amount of poultry.

Eminent French Professor Declares There Is No Such Thing As The Gulf Stream

Requires Team Work

If Every Person Was Careful Fewer Accidents Would Occur

Last year 571 people were killed by motor vehicles in Ontario; 341 people lost their lives by drowning and there were 204 deaths caused by falls. That makes a total of 1,116 lives that were snuffed out by what might correctly be called preventable accidents, or what in plain speech would be called carelessness or recklessness.

What that total will be this year, of course, remains in the lap of the gods, but judging by the fatalities already reported, it will contain a greater rather than a lesser number, unless people are prepared to give greater thought and consideration to this matter.

Schools are closed for the holidays and thousands of children are free, too many of them, to roam at their own sweet will. Will anything serious happen to them?

Surely it will, unless the parents and older people force into their minds the absolute necessity of being careful on the streets, on the roads, at the swimming hole and at other places dear to the heart of childhood.

But all the fatalities will not fall among the children, and very few will really be caused by them. One can rest assured of that fact.

What about the man or the woman who drives at thirty or forty miles an hour on the streets of a town, or at something approaching double that speed on the roads and highways leading to and from these towns? Are they trying to prevent accidents or have they even a thought of danger in their minds?

Contrary to a very general belief it isn't always the other fellow who is inviting an accident. Accidents have a way of happening in all places, and just in one, and there is as one cause for them, but many.

If taking a little more time and being a little more careful would help to reduce this amazing total of preventable accidents, is it not the duty of every man and every woman to give this time and care?

Hundred Acres Of Roses

Two New Varieties Yearly In Bohemia Gardener's Record

Blatna, in southwest Bohemia, was but little known to the outside world in pre-war days. Only the antiquarian interested in its late Gothic church, or the tourist informed of its delightful old castle set in the midst of a great and lovely park, would think it worth while to drop off there before passing on to the larger and historically more interesting towns of Pisek and Strakonice. But today it has become the end of an annual summer pilgrimage of nature lovers and others from all parts of central Europe. For there has been established by Jan Boehm a plant of over one hundred acres of roses.

To the horticulturist, Blatna is a constant source of reference, for Jan Boehm is a continuous experimenter, and his results are eagerly followed by experts in this part of Europe. He produces on the market two new roses each year. Some of his recent introductions include the Masaryk Jubilee rose, the "Bozena Nemcova," named after a famous Czech novelist of the nineteenth century and which is described as "a rose without a thorn," a "Briand-Panepouze" and a "Krasna Uslavanka" rose of two colors. In addition to his own specimens, Boehm grows all kinds of roses, German, French, English and Dutch. The fact that Blatna lies about 1,300 feet above sea level and is exposed to the sharp winds of the Bohemian Forest would have suggested to a less daring man that this was an impossible spot in which to cultivate roses. What has actually happened is that Boehm has produced roses which are of a hardy sort, insured to cold and well able to stand rough climate.—Christian Science Monitor.

Keeps Business Moving

The head of one of the largest firms of cereal manufacturers announces that it is adding a cool million dollars to its advertising appropriation for the current year. The bulk of this appropriation will be spent with newspapers. And some people operating much smaller concerns still persist in thinking that advertising does not pay.

Raw silk exported from Japan last year weighed nearly 20 per cent. more than the 1930 shipments.

Professor Georges Le Danno's of the French Sea Fisheries Bureau says "there is no such thing as the Gulf Stream." This, says the New York Sun, is his ultimatum. He hopes "that this categorical statement will put an end" to the conjectures inspired by reports concerning the inconstancy of the river in the North Atlantic.

The suppression of the Gulf Stream by the eminent French oceanographer is a hard blow to romance. Nothing like it has been reported since grim science abolished the Sargasso Sea of adventure tales and condemned to death all those interesting colonies of hopelessly pent voyagers that were held captive in its entangling weed. The Sargasso Sea had a flora and a fauna of its own, each as rich as the discoverer's imagination; its human population was as diversified as the circumstances set by the story teller required.

The Sun reminds us that the Gulf Stream plays a different but not less interesting part in story. It is responsible for the cold, wet seasons that afflict the eastern coast of the United States and the northwestern coast of Europe. When strange fish appear, the Gulf Stream brings them; when familiar fish disappear, the Gulf Stream takes them away. Outside the Hydrographic Office—a strangely perverse institution so unenterprising that it refuses to be guided by amateurs' reports—the principal function of the Gulf Stream is to change its course. Not a season passes in which its diversions are not recorded everywhere except on the official charts.

It is a fortunate thing that Professor Le Danno's did not revoke the Gulf Stream while Benjamin Franklin was Ambassador to France. Poor Richard was a firm believer in the great current, and he would have stood up for it. Even now there are those who, despite the finality of Professor Le Danno's pronouncement, will hope for its reinstatement. Perhaps it was merely in recess when Professor Le Danno looked at the place where it should have been.

Tariff Pleasantries

U.S. Attitude Puts An End To Possibility Of Neighborly Trade

Colonel W. L. McGregor, president of the Canadian Chamber of Commerce, got a few things off his chest and on to the necks of the American Chamber of Commerce in convention assembled at San Francisco. Referring to tariff pleasantries between Canada and the United States, he says right out that the Americans started the game. The Smoot-Hawley Act is described as putting an end to fifty years of Canadian effort to trade with the United States. Furthermore, the newly threatened restrictions upon Canadian lumber and copper exports come in for rough handling. It is not much good trying to do business with a people who appear unwilling to buy from us, although they sell us one-quarter of their exports, quoth the colonel. In the classic phrase, he is not arguing with the Americans; he is just telling them.—Montreal Star.

Bobby: "Daddy, a boy at school told me I looked just like you."

Dad (proudly): "And what did you say?"

Bobby: "Nothin'. He was bigger'n me."

City traffic officials of Tokyo, Japan, are trying to find a way to decrease the great number of collisions between bicycles and automobiles.

Diamonds never occur in mass formation, always being found in single crystals.

The flying tank is a new fighting machine.

"Oh, I have forgotten my handkerchief! John, just run up and fetch it before the train comes in!"—Sondagne-Strix, Stockholm.

IRMA TIMES
H. W. LOVE, Prop.
A Good Advertising Medium and a
Reliable Newspaper on Oil Activities

The farmers of north Dakota are
joining a league to not sell their
wheat unless it brings a dollar per
bushel. The movement is spreading
to other western States.

The apparent financial success of
the Edmonton exhibition is remark-
able. Attendance figures have been
broken. It reveals a common human
trait, of wanting to forget troubles
and tribulations for awhile, by amuse-
ment and entertainment. While the
exhibition is more or less of a specta-
cle and a show, there are many re-
deeming features in regard to the ex-
hibits and opportunities for outsiders
seeing what the world is doing. In-
spiration may be gathered at the fair
in more ways than one. The exhibi-
tion is an asset to Edmonton and the
province.

TRIM THE EDGES OF GRAIN FIELDS

There are practical as well as
aesthetic reasons for trimming the
edges of grain fields. Weeds often
grow along them, especially if there
have been little end-skips in the seed-
ing. The weeds on the edges grow
strong and ripen many seeds which
are carried to other parts of the field
by roaping and threshing operations.
Trimming the edges of the fields in
July helps to keep farms clean.
A trimmed field looks better than a
ragged one. Squaring off the ends
makes as much difference in the ap-
pearance of a crop as a shave and a
hair-cut do in the appearance of a
man. It gives an air of primness and
the crop looks taller.

Any farmer worthy of the name
is proud of a good looking crop. The
prouder he is the better he will do
his work.

It does not take long to run around
each field with the mower. It will
be time well spent. Character is
judged and formed by such little
things. — Experimental Farms Note.

NOTICE RE POUNDS

To whom it may concern:

FREE — CLOVER SEED

To the first twenty farmers living
within ten miles of Irma, who wish
to sow some sweet clover seed on well
prepared land, I will supply a limited
quantity of seed, either Arctic or Yel-
low Blossom, absolutely free. Seed
should be sown on summerfallow
without a nurse crop, or can be broad-
casted on greenfeed or any crop that
can be lightly harrowed. A good
hard seed bed and shallow sowing
gives best results. — H. W. Love.

Here and There

The Nova Scotia Dairyman's As-
sociation will hold their next an-
nual convention, in 1933, at the
Cornwallis Inn, Kentville, N.S.

Shipments of celery to Canada
this year from Bermuda totalled
25,000 crates in contrast to last
year when the shipments were
virtually negligible.

Eastern Steamship Lines, Inc.,
had heavy traffic on an excursion
from New York to Nova Scotia on
the occasion of the first trip in
June of the S.S. Acadia from New
York to Yarmouth, N.S.

Railroad transportation is an
essential economic function on this
continent and given reasonably
free rein should speedily show
good recovery using it to increase
buying of materials and employ-
ment of labor, says H. Green-
ville (S.C.) News editorially.

Total production of honey in
Canada in 1931 amounted to 27,
867,337 lbs. valued at \$2,058,094.
Ontario led the Dominion with a
production of 12,000,000 lbs. with
Manitoba second with 7,567,375
lbs., and Quebec third with 6,533,
490 lbs.

Ten thousand rainbow trout finger-
lings have been deposited in the
French River in June, follow-
ing 7,500 fingerlings deposited
last year. The previous experi-
ment was so satisfactory that the
present action has been taken and
it is expected that the French River
Camp will have added rainbow
trout to its already well diversified
angling attractions.

Bob Davis, globe-trotting New
York Sun columnist, is back in his
beloved British Columbia, having
recently arrived from Honolulu
aboard the Empress of Canada, of
the Canadian Pacific fleet. He
proposes to spend some time in
fishing expeditions both in the
province and also in the Rockies
where he will meet Irvin S. Cobb
and Courtney Riley Cooper, also
famous American publicists.

Tourists spent almost one million
dollars for every working
day in Canada last year, a sum
virtually equal to \$280,000,000, the
Cannington, Ontario, Gleaner,
points out and claims that this
puts it into the class of his busi-
ness which should be carefully
fostered. Commenting on the
same subject, the Nelson, B.C.,
News states that there are num-
bers of small towns throughout
Canada which have not yet real-
ized what the tourist business
could do for them.

Evidence of the growing popu-
larity of the Canadian Pacific
Railway low rate bargain return
trips, inaugurated this year, was
again furnished by the success of
the Quebec Province and the
excursion to Toronto and Ni-
agara Falls, June 17, when no
fewer than 500 Quebec tourists
took the trip in four specials on the
Friday, returning the following
Sunday night. His Honor the
Mayor of Toronto issued a hearty
welcome to those making the trip.

The thirty-two business and
professional men and women from
the British Isles now touring
British Columbia under provincial
government auspices found Victo-
ria much to their liking and
quite up to advance notices of be-
ing the most "English" city on
this side of the Atlantic. They
were particularly impressed by
the beauty of the formal gardens at
some of the homes they in-
spected and especially with the
famous Butchart Gardens. They
are travelling by Canadian Pacific
Railway. (853)

Canadian Pacific low rate bar-
gain return trips, which have
been a very successful feature of
the company's operation this
year, will include one to the
Maritime Provinces July 22, when
Nova Scotia and New Brunswick
will be covered in round trips to
take in most of the beauties of
the two provinces. The trip
will be varied by a sea passage
in the fast new steamship "Prin-
cess Helene" across the Bay of
Fundy to the Land of Evangeline.

A hole-in-one, though rare, is
not unique, but when it is made
by a lady and for the first time
on the course it rates a headline.
This was done by Mrs. Guy
praise on the 150-yard par three
hole at the Canadian Pacific Re-
creation Club Course at Sorin
near Montreal recently.

Favorable development of this
year's crop on the prairie prov-
inces is noted by the Canadian
Pacific Railway's weekly report
issued recently by the Agricul-
tural Department in Winnipeg.
Most of the wheat in Manitoba and
Eastern Saskatchewan is headed
at an average height of two feet,
and elsewhere ranges between ad-
vanced and heading stages. The
Hall loss has been only local and
in scattered districts.

Bob Davis, roving columnist of
the New York Sun, and probably
the most travelled newspaperman
in the world, has been staying at
the Banff Springs Hotel on his
way back from Hawaii, accom-
panied by Mrs. Davis. Mr. Davis
has a flair for the unusual, and
will likely unearth a wealth of
good material for his column
among the old timers of the Roc-
kies.

Taxation comparisons in con-
nection with motor vehicles and
railroads should take into con-
sideration that the railway pays
for their own roadway, and also
to some extent for the roadway
used by their motor vehicle con-
tainers, says the "Traffic World".
This brings in the question of
how much the motor vehicles
should pay for the highways and
whether they are doing it. (852)

Annual Convention U.F.A. and U.F.W.A. Const. Association

(By Frank Grandage)

Those who think the U. F. A. spirit
is waning should have been at Forest-
burg on July 14th, at the Annual Con-
vention of the Camrose Federal U. F.
A. and U. F. W. A. Constituency As-
sociation. In spite of the heavy down-
pour of rain which made the roads
almost impassable, over eighty were
present and expressions were heard
that had it been a fine day the large
Hall would have been taxed to capacity.
A splendid spirit prevailed and
everyone went home feeling that the
convention had been a real success.
Mr. Chas. P. Hayes, President of the
Association was appointed Chairman.
Mrs. Zipperer, U.F.W.A. Director, A.
G. Andrews, M.L.A., and A. L. Sand-
ers, M.L.A., spoke briefly bringing
greetings from their respective dis-
tricts and all stressed the need of or-
ganization.

Resolutions were passed endorsing
the recent Manifesto, issued by the
U.F.A. and also the views presented
by the U.F.A. Executive to the Im-
perial Economic Conference to be
held in Ottawa.

W. T. Lucas, M.P. president addressed
the Convention and reviewed in a very
clear and comprehensive manner the
work of the last Session of Parlia-
ment. He dwelt on the constructive
and co-operative effort of the U. F. A.
Group were making at Ottawa, but
stated that their work was being ham-
pered by the lack of interest taken by
a large body of the farmers in their
organization at home and said it was
only through organization the farmer
could speak with effective voice. Mr.
Lucas, stated that the present struc-
ture of our Economic system demands
that every industrial class be organ-
ized to protect its own interests; fail-
ure to do so means an unbalancing,
which culminates in a depression. In
supporting the Manifesto, recently is-
sued by the U. F. A., Mr. Lucas quoted
from the speech of Premier Ben-
nett, when introducing to Parliament,
the new Radio Broadcasting Bill, as
the best answer to our critics regard-
ing the Public ownership of Public
Utilities. At the close of Mr. Lucas'
address an unanimous vote of thanks
and one of cordials was tendered
him by the convention.

President, Robert Gardiner, M. P.,
who had been invited to address the
convention was unable to attend, but
Alfred Speakman, M. P. was present
and gave a most interesting and in-
structive address, which was listened
to with rapt attention. Mr. Speak-
man, dealt principally with the Com-
ing Economic Conference, the Mani-
festo He explained how any treaty
made with Australia or New Zealand,
which were mainly agricultural coun-
tries, must be made largely at the ex-
pense of the Canadian farmer and to
the benefit of the Canadian Manu-
facturer, but with any trade agree-
ment entered into with Great Britain,
the situation was reversed and he ex-
pressed the hope that our Manu-
facturers would be willing to make
sacrifices to make the conference a
success. Mr. Speakman pointed out
that the price of farm commodities
had fallen as soon as they went on an
export basis and explained the efforts
that were being made to have a Mar-
keting Board established, which would
remove the surplus from the home
market and thus raise the price to the
producer. He pointed out the respon-
sibility that would rest on the farm-
ers to provide a continuity of supply.
If they were to capture and hold the
British market and also stated that
this could only be done by organiza-
tion. Mr. Speakman, dealt effectively
with the Manifesto and stated that
while it could not all be put into ef-
fect at once, it was the goal to be
attained by gradual evolution.

At the close of his address, Mr.
Speakman, was tendered a hearty
vote of thanks.
When it was announced that the
Federal Members had received an in-
vitation to attend the opening of the
Imperial Economic Conference at Ot-
tawa, a resolution was passed by the
convention, recommending that our
Member, Mr. Lucas, attend same and
that he postpone the holding of meet-
ings in the constituency until after his
return.

The following officers were elected
for the ensuing year.
President—Chas. P. Hayes, Strome,
1st Vice-Pres.—Mrs. Ed. Kehoe,
Camrose.
2nd Vice-Pres.—Gerald Oberg, For-
estburg.

Directors—W. J. Brady, Edberg;
F. W. Cusick and F. R. Holt, Stett-
ler; R. C. Reinhard, Banff; W. H.
Ewart, R.R. 1, Halkirk; Frank Grand-
age, Loughed; Nels Toppe, Sedg-
wick.

Secretary—Frank Grandage, Lough-
heed.

IN THE RIGHT DIRECTION (Calgary Alberta)

Premier Brownlee's plan to abolish
the present system of small municipal
districts in Alberta by merging them
into enlarged municipal areas is a
movement toward sorely needed sim-
plification of government. The same
principle should—indeed will ulti-
mately have to be—applied to provin-
cial legislatures.

Under the Premier's scheme 166
municipal districts now in operation,
together with 143 improvement dis-
tricts now administered by the provin-
cial government, would be amalga-
mated into approximately 40 enlarged
municipal areas. The purpose of
this proposal is to eliminate expense
and to promote greater administra-
tive efficiency.

Although details of the plan are not
yet complete, and will probably not be
until government officials have con-
ferred again with those of the Muni-
cipal Districts' Association, Premier
Brownlee outlined a number of spec-
ific advantages which he claimed
would accrue to the scheme. These
included, as well as those of greater
economy and efficiency, the following:
Greater equalization of the tax bur-
den.

More uniform and more equitable
assessment of the lands in the area,
since the judgment of the assessors
would be applied over a very much
larger area.

More uniform school levies, and a
saving in the administrative costs of
education.

A more co-ordinated system of
road building, the enlargement of the
municipal areas making it possible to
bring the roads into alignment with
those of other districts, and with
the general provincial highway plan.

Premier Brownlee outlined some
of the necessary accompaniments to
the proposed centralization, such as
grouping of localities having a com-
mon interest, consideration of the ac-
cessibility of the administrative cen-
ters and maintenance of the municipal
boundaries along township and range
lines but he stated that he cited all
of the advantages and do not con-
tradict the excellence of the principle
behind this move.

Comment upon the details of the
specific plan would at present be a
hazardous. It is perhaps sufficient to
mention here, in support of the pro-
posal, that The Alberta has long
advocated simplification of govern-
ment as imperative in the face of
modern conditions.

FOR AUTUMN PASTURE

In the climate of the Canadian West
cereals decidedly outyield the peren-
nial meadow plants. Oats and winter
rye are productive pasture crops.
Though lacking the complete nutritive
quality of grasses and legumes they
are useful supplements.

Oats sown July on the Dominion
Experimental Substation at Beaver-
lodge have in certain seasons re-
mained practically green until mid-
October. Of course this would hold
true only on the higher and more
frost-free land and by no means in
every year there. Oats however, make
acceptable grazing even when decidu-
ously touched with frost. Half ripened
stands have been pastured by dairy
cows even in the early winter.

Of all crops on the Substation win-
ter rye is the last thing green in the
autumn and the first one green in
spring. Sown early, it may be grazed
throughout the summer, during au-
tumn and again in spring. More often
when autumn grazing is the objective
July seeding is practised.

Rape makes excellent fall pasture
but must be utilized judiciously for
ruminants because of the chance of
bloating.

Corn planted in widely spaced rows
as a summerfallow substitute would
provide a meagre quantity of autumn
grazing, incidentally helping, perhaps
to check soil drifting.

W. D. Albright, Superintendent,
Dominion Experimental Substation,
Beaverlodge, Alta.

COST OF HORSE LABOR

The superintendent of the Federal
Experimental Station at Indian Head,
Sask., has provided some interesting
and timely information about the ac-
tual cost of work horses under prac-
tice conditions. From the records
kept in connection with seven head
the average cost of feed for the sea-
son of active farm operation was
\$82.14, while the average number of
hours worked was 1,840 which rep-
resents a work value, on the basis of
16 cents per hour, of \$110.98.

Health Service

OF THE

Canadian Medical Association

Edited by

GRANT FLEMING, M.D., ASSOCIATE SECRETARY

TEETH AND HEALTH

Good teeth are not only useful and ornamental, but what is of more importance is the fact that they make for good health. It would seem, therefore, that everyone would want to have sound, healthy teeth.

Good teeth are the product of good building materials. You cannot have good teeth if you do not take into your body with your food the substances required in the construction of strong, sound teeth. From before birth, on through the years of growth, during which time the teeth are being built up, the diet of the mother and child must contain, along with other essentials, the minerals required to make good bones and teeth.

These minerals are available in milk, fresh vegetables, fruits and whole grain cereals. Unless these foods are used in sufficient quantity by the expectant and nursing mother, and by the child during his years of growth, the teeth will be of poor quality and will not be healthy in spite of the care which may be given to them later.

This does not mean that the teeth are to be neglected. The teeth are to be kept clean by regular brushing. The best teeth are the result of proper food and regular cleaning. Even poorly built teeth, the result of improper diet, benefit by the regular use of the tooth brush.

The tooth brush should be used after each meal to remove particles of food remaining about the teeth. These particles remaining in the mouth decay and ferment and so lead to damage of the enamel. This can and should be avoided. The most important time to clean the teeth, the time which should never be neglected, is after the evening meal before retiring.

The health of the teeth and of the gums has a very direct influence upon the general health. The presence of a small amount of pus at the root of a tooth, the result of the activity of some germs, may be responsible for serious conditions arising in other parts of the body. The tooth may look healthy, even though it has hidden in its root this collection of poison. Your dentist will, if you give him the opportunity by regular visits to his office, detect and correct such conditions before they can do harm. Healthy teeth can be secured and kept healthy by eating the right kind of food, by regular cleaning and by periodic dental supervision and treatment when required. In this way, not only will the health of the teeth be cared for, but the general health of the body will be assisted and the body protected against the serious menace which arises from diseased teeth.

Questions concerning Health addressed to the Canadian Medical Association, 184 College Street, Toronto, to, will be answered personally by letter.

MUNICIPAL HAIL INSURANCE

Application forms for Municipal Hail Insurance are now available and can be had from the Secretaries Office of any purchaser of hail insurance against hail and the premiums collected enter as taxes.

Chas. Wilbraham, Sec.-Treas.
M. D. Battle River, Irma, Alta.

WAINWRIGHT EDITOR ENTERS NEW LINE OF BUSINESS

Rev. W. H. Zook, minister of the gospel at Wainwright, will control the destinies of the Star, assuming control of the paper on July 1st, according to announcement made last week in that paper. Rev. Zook has taken a five-year lease on the paper, the statement continues, "pending the coming to Canada of his son, Maurice, who at present holds a position on the staff of the Cocomino Sun, at Flagstaff, Arizona."

Walter J. Huntingford, who has been associated with the Star since its foundation, leaves shortly on a motor trip to Dever, Col., and expects to enter the electrical contracting business at a later date. Mr. Huntingford has been prominent in weekly journalism in Alberta for many years. He is widely known and has conducted a paper commanding the pride of his district and the esteem of his fellow newspaper men. His withdrawal from the field marks just one more of the numerous changes which have taken place among the newspapers of the west, and in this province in particular, during the past year.

Viking

The picnic in celebration of the twenty-fifth anniversary of the formation of the Lake Thomas School District held at the school grounds four miles north of town last Friday afternoon proved to be a real success and was well attended by residents of the district. A special "Welcome" sign and other decorations made the grounds a colorful and inviting scene. Special tables for the basket picnic had been erected in the adjoining grove of trees.

A special program was given from the steps of the school house with Mr. W. A. Walker, present chairman of the school board presiding. Miss Amelia Haffo, secretary, read the names of the trustees since the beginning of the school district, a list of which is printed herewith. A list contained the names of twenty teachers who had held sway in the school during the past twenty-five years. It is significant to note that the first teacher, Mrs. Hans Hanson, and the present teacher, Miss S. G. Lart, also many of the first pupils, were in attendance.

Another pleasing event was the presentation of a purse from the pupils to Mrs. Hans Hanson, former Miss Riland, the first teacher of the school. Mrs. Hanson replied feelingly and expressed her appreciation of the gift.

Mr. J. E. Kellogg, chairman of the original board of trustees spoke of the early struggles to build a school house and told of several interesting incidents that happened in the early days.

H. G. Thunell delivered an appropriate address, pointing out that the celebration was unique in being the first of its kind held in the district and perhaps in the province. He also dealt with the changes that have occurred in the district, the province, the dominion and the world at large during the past twenty-five years, with special emphasis on the progress made in the local district. He lauded the work of the pioneers in establishing a school so early which provided a means whereby the children secured the prime requisites of an education. Other facts and figures were quoted to show the extensive changes that have practically revolutionized the social and political life of the people in the past quarter of a century.

Mr. George Gorman, chief inspector of schools arrived later but the crowd gathered again to hear greetings from the department of education and the Hon. Perrin Baker, minister of education for the province. Mr. Gorman told of the difficulties which confronted many rural schools today in carrying on, and congratulated the Lake Thomas S. D. on the success attained in keeping the school open continuously for twenty-five years. He pointed out the co-operation necessary between parents and teachers, and pupils and teachers, in order that the best results may be obtained. He stressed the value of an education which he considered an investment that did not depreciate in value like stocks and bonds, real estate and other holdings. An education was something that no one could take away from you. Altogether his talk was optimistic in tone and contained some sound advice.

A program of sports and races was indulged in by the young folks, while the pioneers gathered in groups and swapped yarns of the early days, after which all repaired to the grove where a bountiful basket lunch was served in the cool shade of the trees. A refreshment booth was kept busy during the hot afternoon serving refreshments. A dance was held in the young people's hall in the evening which concluded a successful celebration.

The town and district is showing a considerable growth in spite of financial conditions. C. Dekker has recently moved into a new bungalow erected on his farm, four miles west of town; H. A. Meredith's residence is under construction; a crew of workmen are busy on the new elevator; repairs are being made to the Security elevator; Brown's Garage has been painted and enlarged; a new store has opened up in the old Clinton building; Mr. and Mrs. Scott have moved into a remodelled residence on Second Ave. East; Mr. Clinton is building a greenhouse near his residence, and many other smaller improvements are noted about the community.

Among those who were visitors at Sylvan Lake last Sunday were Mrs. Graham, Mrs. Thunell, G. W. Green, Roland Brook, and Harold Green. While there they were guests at the cottages occupied by Mrs. Green and Mrs. Hopkins in Calgary, and Dr. Mrs. G. M. Little, formerly of this place. They report that Sylvan Lake has many excellent attractions and that the beach is ideal. Thousands of visitors from all over Alberta thronged the beaches during the hot Sunday.

S. J. HUNGERFORD APPOINTED ACTING PRESIDENT FOR C.N.R.

With the resignation of Sir Henry Thornton as Chairman and President of the Canadian National Railways, effective August 1st, Mr. Hungerford, Operating Vice-President, has been appointed by the Board of Directors, as Acting President of the Company. Samuel J. Hungerford is one of Canada's best known railroad operating officers. His experience has ranged, in more than 45 years, from the humble position of machinist's apprentice, where he commenced in 1886 to that of Vice-President in Charge of Operation, Maintenance and Construction of Canada's largest railroad system, the Canadian National Railways.

Born in Bedford, Quebec, sixty years ago, S. J. Hungerford entered railroading as an apprentice with the "Southeastern" Railroad, later part of the C. P. R., at Farnham, Que. Completing his apprenticeship he worked as machinist at many points in Quebec and Ontario and in 1884 was appointed Chargehand at Windsor Street Station, Montreal. From 1897 Mr. Hungerford worked as assistant foreman, locomotive foreman and general foreman at Farnham, Megantic and McAdam Junction and in 1901 was transferred to Cranbrook, B. C. as locomotive foreman with the Canadian Pacific. From Cranbrook, he moved in 1903 to Calgary as master mechanic of the Canadian Pacific's western division, and in the following year was made superintendent of the locomotive shops at Winnipeg, becoming in 1908 superintendent of shops.

In 1910 Mr. Hungerford joined the Canadian Northern Railway, as superintendent of rolling stock with headquarters at Winnipeg and in 1915 he moved to Toronto in the same position. In 1907 Mr. Hungerford became general manager of the Eastern Lines, Canadian Northern Railway, and in the following year was named Assistant Vice-President, Operating Maintenance and Construction Departments of the Canadian National Railways with headquarters at Toronto. With the taking over of the Grand Trunk Pacific lines Mr. Hungerford in October 1920 became Vice-President in charge of Operating and Maintenance Departments of the Canadian National and Grand Trunk Pacific Railways and two years later, in October 1922, he was made Vice-President and General Manager of those lines, with headquarters at Toronto, in which position he continued until his appointment, in February 1923 as Vice-President in Charge of Operation, Maintenance and Construction of the Canadian National System, with headquarters at Montreal.

Railroading conditions have altered vastly since the days when S. J. Hungerford commenced service as an apprentice at Farnham in 1886. Then, woodburning locomotives were still in use; cars were coupled by the old "links and pins" and airbrakes were unknown. Hours of work were long and pay was small, and apprentice training systems were not brought to the stage where they are today when every effort is made to educate and encourage the boys to learn while they earn and fit themselves for better jobs.

Locomotives of 1886 were pygmies as compared with the 6100, 4100 and the 5700 classes of engines used today, on the Canadian National System, and the trains they hauled were mere toys compared with the huge freight loads and all-steel passenger trains which are now operated. Practices of handling locomotives in shops and on the road have altered with the growth in size of locomotives which have had to be "hopped" and many of the improvements in shop practices in Canada have developed under the watchful eye of S. J. Hungerford, who has always held the admiration of those who worked with him because he knew every phase of the work so thoroughly himself.

A want ad. in this paper does big work at small cost. Now is the time to sell, trade, or exchange for something else.

What do you look for and expect when Buying a New Binder ?

YOU LOOK FOR STRENGTH, LIGHT DRAFT, AND A SURE KNOTTER

First, the Massey Harris has the Strongest Frame of any binder on the market, the 1932 model has new improvements on the frame. 2nd, it is the Lightest Draft Binder on the market having 19 roller bearings and two ball bearings; ask 1931 purchasers about this. 3rd, the well known Knotter needs no comment, it is simple to adjust, saves twine and ties 100 per cent. 4th, Levers convenient and easy to operate. Syphon oilers on packers, and Hard Oil Cups on a new and improved all steel bull wheel which has deep lugs giving plenty of traction. The new four-carriage with two horses each side of the tongue, completely eliminates side draft, and is a marvel of strength and simplicity, and there is no one horse pulling more than another.

Next, when you buy a Massey Harris Binder in Irma, you get a binder well set up, no adjustments and tightening up after you get it. It goes out ready for the field to save you time and save your crop with a minimum of expense and followed up with a repair service second to none.

And don't forget the 10 per cent Discount policy of the Massey Harris which has had a Canada-wide endorsement. When you buy, you know exactly what you pay. No other plan tells you that. Call in and See this New Binder at your Agent's and be convinced of the Value we are giving.

Holland Twine

We expect a car-load of Twine in about the 18th of July, we are handling this twine believing it to be the Best on the market regardless of price. Call in and see it.

WORLD HAPPENINGS BRIEFLY TOLD

The United States celebrated the 150th anniversary of Independence Day at a cost of more than 240 lives.

The \$2,100,000,000 compromise unemployment relief bill was finally approved by the United States House representatives and senate conferees.

Limited sockeye salmon packs for 1932 in British Columbia waters are estimated in an advance report prepared for Hon. S. L. Howe, Provincial Fisheries Commissioner.

A shepherd and several hundred sheep were frozen to death on Mount Olympus, near Bursa, Turkey, during a terrific snowstorm which followed a recent heat wave.

By means of X-ray doctors of the Canadian Medical Association were able to read lead type upside down with their eyes closed in an experiment.

Ontario and Manitoba joined hands in an unique Dominion Day celebration. The natal day of the Dominion of Canada was chosen for the formal opening of the first highway to connect the two provinces.

After several months of investigation, F. A. McGregor, registrar under the Combines Act, has reported the existence of a price-fixing combine among the fruit basket manufacturers of Ontario.

Mrs. Katharine Medill McCormick, widow of the diplomat, Robert S. McCormick, died of a heart attack in Versailles, France. She was 70. She was the mother of Col. Robert R. McCormick, editor and publisher of the Chicago Tribune.

Pirate treasure—\$60,000,000 in pieces of eight, gold and silver bars, and church relics—has been discovered on Cocos Isle by an expedition which left Vancouver, B.C., last February, Capt. R. D. Adams, a member of the party, reported.

Gold that led Jack Hornby and two young Englishmen to death by starvation in the Thelon River country in 1927 is beckoning to other prospectors. This summer a party will go into the barren wastes in search of Hornby's secret strike.

A difficult operation was reported at the homeopathic hospital, Montreal, where an eight-year-old boy was taken with a punctured heart. Dr. J. Harry Condon successfully sewed the right ventricle of the heart. The boy, Robert Shepherd, fell upon his penknife while running, the blade penetrating the heart.

Emancipation For the Deaf
Social emancipation for deaf persons, opportunities to obtain education and employment for which they are qualified were demanded by Edwin G. Peterson, Saskatoon, superintendent of the Saskatchewan School for the Deaf, at the triennial convention of the Western Canada Association of the Deaf, held in Winnipeg.

Old Roman Coins
Roman coins dated A.D. 320 to A.D. 324 were unearthed at the riverside home on the Thames of Viscount Craigavon, premier of Northern Ireland. The coins were found by a workman digging on what is believed to be the site of an old Roman road.

Far Away Yet
Man's greatest efforts at producing in laboratories high voltages of electricity have enabled him to produce 10,000,000 volts, which is one-tenth the voltage of a lightning flash.

The Rio Grande valley in Texas is producing ribbed oranges with skins like that of a cantaloupe.

Try Lydia E. Pinkham's Vegetable Compound

She Shouldn't be Tired
No energy—circles under her eyes. I have only tried Lydia E. Pinkham's Vegetable Compound in tablet form, and she could be strong and happy again.

W. N. U. 1850

Mac Is Old War Club

Gift To Queen Victoria Going Back To Fiji King

Among the thousands of treasures in Windsor Castle is the war club of the former King of Fiji, which was presented to Queen Victoria 58 years ago when King Thakombau acknowledged to Sir Hercules Robinson the sovereignty of Great Britain.

This war club, by command of King George, is now to be returned for ceremonial use as a mace in the Fiji legislative council. When the Fijian king handed over the war club to Sir Hercules Robinson he "sent his love to Her Majesty," assuring the Queen of his devotion and the devotion of his people to her descendants. The king desired to give Her Majesty the only thing he possessed that would be of interest to her and as a further token of his submission he had devices of doves carved on the sinister knobs of the club.

Waiting Time Is Over

Prosperity Must Be Met Half Way Opinion Of Barnjum

Frank J. D. Barnjum, that Canadian optimist who confesses to having weathered three or four panics in his time, has no hesitation in saying that prosperity is now simply waiting for people to go out and meet it half way. "Don't keep on waiting; if both wait, we shall never meet," is the word he broadcasts in a communication to the press. "If all those who have money, and there are a sufficient number who have, would go out and buy freely as they did in 1920, the depression would soon be a thing of the past. Buy, build, repair and stock up now, and by so doing save thirty to fifty per cent., is the word from the man who has been recently buying forest tracts in this country in order to save them for posterity. "And then advertise," he adds.

Winnipeg Newspaper Union

A Dainty Blouse That Is ALTOGETHER JUST AS CHIC AS CAN BE

It has Paris stamped all over it. Yet it's not a bit difficult and need not be expensive to make.

The original in white crepe silk is exceedingly wearable. It can be worn with a suit or a separate skirt for sports.

Of course you can make it in organdy, dotted batiste, lace or tulle net.

The saving over the original model is enormous. And it's so entirely easy to fashion it.

Style No. 547 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards of 30-inch material.

The front plastron effect is very new and becoming to most figures. And don't you like the bow tied sleeves?

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

AN UNFORGETTABLE SIGHT

"English" Irishmen lining up at Bow Street, London, for registration as aliens when Mr. De Valera secures the independence of Ireland. Among the famous celebrities are, left to right: Jimmy de Rothschild, Lord Moyne, Sean O'Casey, Lord Castlereagh, Lord Moyneham, Lord Carson, Sir John Lavery, Lord Murphy, Earl Beatty, Bernard Shaw, Lord Derby, etc.—Low in the London Evening Standard, London, England.

Shall Our Monetary System Be Changed (Continued)

An Analysis of Several Of The Proposals Made (By Major Strange)

(6) That Central Banks should exercise a greater control over credit so that in times of prosperity credit would be curtailed in order to prevent over-speculation and over-expansion of buying and production, and so that in periods of adversity credits would be more freely available.

(NOTE—Some critics consider that this suggestion involves an over-straining of the working of the quantity theory of money. (In a subsequent article a brief explanation of the quantity theory of money will be attempted.) Other critics ask, who would be wise enough to decide when a period of over-expansion had arrived? and when prices are declining and persons are fearful of making financial commitments for a future which they cannot foresee—who, it is asked, would be brave enough to borrow and use the credit even though it were available?)

(7) That the Canadian paper dollar shall be based upon "units of labour" instead of gold. This is exactly the proposal made by Karl Marx in 1848 although he was clearly that there would be difficulty in deciding how the "socially necessary" unit of labour should be computed.

(NOTE—Many socialists and Communists advocate this today. No competent economist, as far as we are aware, however, is willing to regard such a system of price determination as even remotely workable or possible.)

(8) That the purchasing power of the Canadian paper dollar shall be based upon an average of the wholesale commodities instead of upon gold, and that debts should be repayable with dollars of the same purchasing power that the debts were incurred. Which authority's index number would be chosen, and which commodities should be included in the make-up of the average, and how compensations of price would be made to correct over-production or deficiency in any one commodity, or how a surplus of any one commodity would be governed, is not clearly explained.

(NOTE—This is the method advocated by some termed "managed currency." Whether any set of human beings have and sufficient experience with the management of money, or sufficient wisdom, to control either inflation or deflation of money without any solid metal as an anchor, is questioned by many students.)

(9) That bimetalism shall be instituted, using gold and silver as alternatives, and shall be exchangeable for one for the other, or for paper currency, at a ratio set by law.

(NOTE—Every attempt in history that has been made to set up bimetalism has ended in failure. Gresham's law seems inevitably to function, resulting in the most prized metal of the two being driven out of circulation and hoarded, so that eventually only one of the two metals is left to serve as a standard and medium of exchange.)

(10) That symmetrism should be set up, which means that both gold and silver, not as alternates as in bimetalism, but tied together in definite proportions in metal bars, shall be used as the standard and that paper currency shall be exchangeable for neither gold nor silver, but only for bars of the metal unit of the two.

This was first suggested by the eminent economist, Professor Marshall. It is felt that the workings of the quantity theory of money would bring about an increased commodity price level if increasing quantities of monetary metal as a base could be put into use.

(NOTE—The objection to this scheme again is that it would be difficult for nations owning various amounts of gold to decide on the relative proportions of gold and silver to be used. Also the fear is expressed that the bars might be melted down by individuals or nations, and the most prized metal of the two would be hoarded.)

(11) That the silver coins in use throughout the world should contain a greater percentage of silver. Also that silver bars might be used as a base for paper money of small denominations, but of generous amounts, which would be exchangeable for silver only and not for gold. This, it is claimed, would raise the price of silver and so help the buying power of Eastern countries on a silver standard. It is argued, however, by critics that any enhancement of the price of silver would seriously harm producers and debtors in these Eastern coun-

tries, and that even the benefits to Western people might not be as tangible as assumed by some.

(12) That the use of all currency and credit shall be nationalized and that all finance and banking shall be operated and managed by Government instead of by private institutions.

(NOTE—In criticizing this proposal, note is made that no Government could possibly have the necessary capacity for successfully managing any large matters of finance or banking, and the efforts to distribute the credit "at cost" by Governments to the people usually end in high cost and in disastrous losses which have to be borne by the taxpayers.)

(13) That the monetary system and other financial and banking methods with gold as a basis, should be done away with and replaced by a claim proponents of this, the so-called crisis of money and the falling of prices has been the result of and not the cause of the present depression, which, these claim, have been brought about by other factors, many of which are without international origin, but as in the past all originating in the War and its aftermath of prejudice, hates and extreme nationalisms.

These orthodox supporters of the gold standard suggest that if international arrangements can be made that will restore confidence between one nation and another, so that some of the high tariff walls might be lowered, which would result in a freer exchange of goods and commodities, and if reparations and War debts can either be modified or be paid mainly in goods and not in gold, that subsequent depression would soon take place, and that it would be found that there is sufficient gold in the world for all practical purposes and to support at least the pre-war level of all prices. Nations are rapidly learning, it is pointed out, the simple financial principle, long known to and practiced by Great Britain, that creditor countries should not export gold and commodities abroad, but foreign goods at home, or take their gold and spend it in foreign countries.

The economists draw attention also to the fact that as commodities become cheaper, gold becomes dearer, which allows of the working of lower grade gold ore bodies, which will increase the production of gold. Dearer gold will also bring out much that has been hoarded. These arguments, however, increase in the amount of gold will automatically, according to the quantity theory of money, result in a higher price level of goods and commodities. At the very worst, state these people, deflation will continue until all goods, commodities, interest on money, and all things, have an equitable exchange value. Debts that cannot be paid will either be cancelled or written down taxes will have to be reduced, and so practically a new start will be made, but on a lower general price level which will require, of course, much less gold to support it.

In the consideration of all these suggestions for monetary reform, two important facts must be borne in mind. One is that Canada is bound by contract to pay each year in gold at least \$200,000,000 in interest and in repayments of debts. No inflation of the Canadian dollar will reduce this one iota. The other is that Canada is an exporting nation; that the goods and commodities she sells for export are paid for in foreign currencies. No amount of inflation of the Canadian dollar will ever increase by one cent the amount of money received from abroad for these exported products.

(NOTE—The Research Department of the Seale Grain Company has written two articles on Bimetalism and on the Gold Standard. These are available to any who may be interested.)

Subsidy Had Expired

Householders In Ireland Must Bear Expense Of Building

People who recently built houses in Omagh, Ireland, have failed in their efforts to get subsidies from the city and the government, and must pay for all the work and materials themselves. At a recent council meeting it was disclosed that many had started the houses under the impression that they would receive aid from both the municipality and the country. It was then revealed that the subsidy had expired March 31, 1931.

"Nature cannot jump from winter to summer without a spring." Nor from summer to winter without a fall.

Contract Bridge

By Hamlin B. Hatch, Cavendish Club, Toronto

The Limitations Of Distributional Valuations In Contract.—As previously stated, quantitative trick taking probabilities of any two combined hands in contract are determined by three kinds of tricks, i.e. Honor tricks, long suit tricks and short suit or ruffing tricks. Valuing the combined twenty-six cards of any particular deal by the valuation table given in a previous article is, as a rule, very accurate up to a total of ten tricks. Beyond ten tricks, it is important that the player realizes that there may be a duplication of values in the hand. By this is meant that high card tricks and ruffing tricks as figured independently in the two hands, may overlap, and that, because of this overlapping, the distributional trick taking probabilities of the two hands may add up to anywhere from twelve to fifteen tricks when in the actual play only from ten to eleven tricks will be taken. The axiom follows then, that in high contracts, it becomes necessary, as a rule, in order that the high contracts may be fulfilled, the combined hands be fairly strongly fortified with aces and kings. Therefore, in high contract bidding, it becomes important that the partnership endeavour to ascertain from each other's response whether or not there is value duplication in the hands. Occasionally hands occur which will make twelve or thirteen tricks when there is only from two to four high honor cards present in the combined hands, but this is so only when value duplication is entirely absent.

High contract bidding carries any partnership into the realms of slams. There is one definite, never to be departed from, rule for slam bidding. The rule is, that it is definitely essential for the slam the combined hands have in case of little slam control of at least three suits, and in grand slams, control of all four suits. By control is meant the ability to take the first round trick of the suit controlled. So that in order to bid and make little slam the two hands must have either three aces, or two aces and a void suit, or one ace and two void suits. Generally it may be said that slams are most usually made in hands which are unbalanced and in which the unbalance does not involve value duplication. Balanced hands on account of the fact that there are few if any, long suit tricks and ruffing tricks, do not make for the success of high contracts and slams. The tricks taken in balanced hands, especially in hands of the 4, 4, 3, 2, and 4, 3, 3, 3, types are practically all honor card tricks. High contracts in balanced hands therefore, can only be made when the two hands are replete with aces and kings, queens and jacks. As a rule then, it is well for the contract player to realize, that slam contracts on balanced hands should only occasionally be contracted for and then only when the bidding used to arrive at the slam has definitely located enough high cards to make the success of the slam bid fairly certain. On the other hand, slam contracts may be bid on unbalanced hands much more frequently, as the additional factors of long suit and short suit tricks probabilities make slams much more probable than in hands where these additional factors are lacking.

The hand following is given as an example of arriving at a high contract on account of value duplication.

North
Spades Q 10 x x
Hearts none
Diamonds A K x x x
Clubs K x x x

West
Spades x x x
Hearts x x x
Diamonds Q x x x
Clubs x x

East
Spades x x
Hearts Q J x x x
Diamonds J 10 x x
Clubs A Q

South
Spades A K x x
Hearts A K x x
Diamonds none
Clubs x x x x x

South Is The Dealer

The Bidding
South West North East
1 Spade Pass 3 Diamonds Pass
3 Hearts Pass 4 Clubs Pass
5 Clubs Pass 6 Spades Pass
Pass

The combined hands figure fifteen taking tricks and in actual play will only take eleven tricks. The duplication comes in this case in two instances—First the void heart in the North Hand, and the Ace King of Hearts in the South Hand. The void Diamond in the South Hand, and the Ace King of Diamonds in the North Hand. The hand should not be bid slam as this duplication of values was shown in the bidding.

The latest device for postal facility comes from Germany and consists of a letter-box in which letters are stamped as you post them.

DR. HAMILTON'S PILLS
STOP HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

Recipes For This Week

(By Betty Barclay)

CRUSHED PINEAPPLE CREAM

- 1 cup milk.
- 1 cup cream.
- 1/2 cup crushed pineapple.
- 1 junket tablet.
- 1 tablespoon cold water.
- 3 tablespoons sugar.

Dissolve junket tablet in cold water. Warm milk, cream and sugar to lukewarm (110 degrees Fahrenheit) NOT HOT—stirring constantly. Add dissolved junket tablet, stir a few seconds and pour at once into individual dessert dishes. Let stand undisturbed until firm—about 10 minutes. Then chill. When ready to serve top with crushed pineapple.

GLAZED CARROTS

These glazed carrots go particularly well with the hot roast lamb and may be cooked in the oven at the same time, thus conserving fuel.

Cook six large carrots for fifteen minutes in boiling salted water. Remove the skins. Cut into slices. Place in a baking pan. Make a syrup with one-half cup brown sugar, one-fourth cup butter and one-fourth cup hot water. Pour over the carrots and bake until brown. Baste occasionally.

Dream Becomes Reality

Cargo From Britain Coming To Northern Seaport

Western Canadians were convinced that their dream of many years was becoming a reality, declared W. H. Harling, steamship agent, upon his return from the prairies, discussing the port of Churchill on Hudson Bay. Soon the first inbound cargo to reach the new port would arrive on board the S.S. Pennworthy, he said. Liquor for Saskatchewan and Manitoba, barbed wire, netting, toys and fancy goods; chinaware, paint, confectionery, dry goods, binder twine, stationery, school and laboratory equipment, boots and shoes and a number of other commodities would make up the ship's cargo.

Salmon From Hudson Bay

Trial Shipment From West's Northern Seaport To Be Made Soon

The first samples of fresh Hudson Bay salmon and trout will shortly be shipped to the "outside," according to John Ingerbrigtsen, fisherman, who has received orders for trial shipments. One will go to Capt. Harvey L. Webb, president of Transport Limited. The Pas, Manitoba, and the other will go to H. S. Johnston, representative of the Booth Fisheries, Ltd., The Pas, Manitoba. Ingerbrigtsen also has an order from the Guest Fish Company, Winnipeg, for a sample order of Arctic fish.

Rogers Stands Corrected

Will Rogers has been telling American bankers that they should visit Canada and find out why only one Canadian bank has failed in ten years. The record is even better than that. There has been only one failure since 1914—one failure in nearly eighteen years.

A machine which makes griddle cakes has ousted fifty girls in Childs restaurants in New York.

Receipts of government railways in Japan last year were nearly \$11,000,000.

"But, my friend, why on earth do you wear garters on the outside of your trousers?"

"Because I dropped a collar stud down my neck this morning." — Sogdaniensis-Strix, Stockholm.

"DON'T BE ROBBED OF YOUTH!"

SAYS RALPH GRAVES

RALPH GRAVES
Screenplay Writer

year after year.

"The screen and stage stars usually keep that lovely irresistible glow that youngsters have. And lots of other women, these days, seem to have learned their complexion secret."

"Above all, guard complexion beauty," the stars will advise you. "Use gentle, soothing Lux Toilet Soap regularly as we do!"

Attresses the world over use fragrant, delicately white Lux Toilet Soap to keep their complexions always exquisite. In Hollywood, where 686 of the 694 important actresses are devoted to it, this face soap is official in all the great film studios.

You are sure to love the way it cares for your skin! The caress of dollar-a-cake French soap for just 10c!

THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET FIEDLER

Author of "The Splendid Policy of Far End."

Hodder & Stoughton, Ltd., London.

CHAPTER XXV

Arranged by Telephone

The visit to London, if it had not been so profitable in the results which Lady Anne had hoped for, had at least accomplished certain things.

It had acted as a brake upon the swiftly turning wheels of two presciently pointed at the top of that steep hill of which no traveller can see the end, but which very surely leads to heartbreak and disaster, and had sufficed, as Jean had suggested that it might, to restore Nick to a more normal and temperate state of mind.

He and Claire had passed a long hour alone together the day after his return to Staple, and now that the first violent reaction, the first instinctive impulse of unbearable revolt from Sir Adrian's spying and brutality had spent itself, they had agreed to shoulder once more the burden. Fate had laid upon them, to fight on again, just holding fast to the simple knowledge of their love for one another and leaving the ultimate issue to that great unfathomable Player who "hither and thither moves, and mates, and slays," not with the shadowed vision of our finite eyes but with the insight of eternity.

Jean had seen them coming hand in hand through the cool green glades of the wood where the great decision had been taken, and something in the two young, stern-set faces brought a sudden lump into her throat. She turned swiftly aside, avoiding a meeting, feeling as though there was high ground upon which not even so close a friend as she could tread without violation.

To Jean herself the week in London had brought a certain new tranquillity of spirit. Quite naturally and without effort—thanks to Lady Anne's skilful stage-management—she and Blaise had been constantly in each other's company, and, with the word "Beloved" murmuring in her heart like some tender undertone of melody, the hours they had shared together were no longer a mingled ecstasy and pain, marred by torturing doubts and fears,

but held once more the old magic of that wonder-day at Montvane. Somehow the dividing line did not seem to matter very much, now that she was sure that Blaise, on his side of it, was loving her just as she, on hers, loved him. Indeed, at this stage Jean made no very great demands on life. After the agony of uncertainty of the last few months, the calm surety that Blaise loved her seemed happiness enough.

Other sharp edges of existence, too, had smoothed themselves down—as sharp edges have a knack of doing if you wait long enough. Burke seemed to have accepted her last answer as final, and now spared her the effort of contending further with his tempestuous love-making, so that she felt able to continue her friendship with Judith, and her consequent visits to Willow Ferry, with as little "gene" as though the episode at the "Honey-mooners' Inn" had never taken place. She even began to believe that Burke was genuinely slightly remorseful for his behaviour on that particular occasion.

Apparently he had not made a confidant of his sister over the matter, for it was without the least indication of a back thought of any kind that she approached Jean on the subject of spending a few days with herself and Geoffrey at their bungalow on the Moor.

"Geoff and I are going for a week's box on Dartmoor, just by way of a 'pick-me-up.' Come with us, Jean; it will do you good after stuffy old London—blow the cobwebs away!"

But here, at least, Jean felt that discretion was the better part of valour. It was true that Burke appeared fairly amenable to reason just at present, but in the informal companionship of a back thought of any kind that she approached Jean on the subject of spending a few days with herself and Geoffrey at their bungalow on the Moor.

Therefore, although the Moor, with its great stretches of gold and purple, its fragrant, heathery breath and its enfolding silences, appealed to her in ways in which nothing else on earth seemed quite to appeal, pulling at her heartstrings almost as the nostalgia for home and country pulls at the heartstrings of a wanderer, she returned a regretful negative to Judith's invitation. So Burke and Mrs. Craig packed up and departed to Three Fir Bungalow without her, and life at Staple resumed the even tenor of its way.

The weather was glorious, the long, hot summer days melting into balmy nights when the hills and dales amid which the old house was set were bathed in moonlight mystery—phantasy, cavernous with shadow where undreamed of dragons lurked, lambent with opalescent fields of splendour whence uprose the glimmer of half-visited palaces or the battlemented walls of some ethereal fairy castle.

More than once Jean's thoughts turned wistfully towards the Moor which she had so longed to see by moonlight—Judith's "holey" of holes that God must have made for His spirit—and she felt disposed to blame herself for the robust attack of caution which had impelled her to refuse the invitation to the bungalow.

"One loses half the best things in life by being afraid," she told herself petulantly. "And a second chance to take them doesn't come!"

She felt almost tempted to write to Judith and propose that she should join her at the bungalow for a few days after all if she still had room for her. And then, as is often the way of things just when we are contemplating taking the management of affairs into our own hands, the second chance offered itself without any directing on Jean's part.

The telephone bell rang, and Jean, who was expecting an answer to an important message she had phoned through on Lady Anne's behalf, hastened to answer it. Very much to her surprise she found that it was Burke who was speaking at the other end of the wire.

"Is that you, Geoffrey?" she exclaimed in astonishment. "I didn't know you were home!" "I thought you were miles away from anywhere!"

"I can't. And we are," came back Burke's voice. From a certain quality in it she knew that he was smiling. "I'm in Oxshott, phoning from a pal's house. I've a message for you from Judy."

"Yes!" intoned Jean enquiringly. "She wants you to come up to-morrow, just for one night! I'll be a full moon and she says you have a hankering to see the Moor by moonlight. Have you?"

"Yes, oh yes!"—with enthusiasm. "Thought so. It certainly does look topping. Quite worth seeing. Well, look here, Judy's got a party of friends, down from town, who are coming over to us from the South

Devon side—going to drive up and stay the night, and the idea is to do a moonlight scramble up on to the top of one of the tors after supper. Are you game?"

"Oh, how heavenly!" This, ecstatically, from Jean.

"How what?"

"Heavenly. Heavenly!"—with increasing emphasis. "Can't you hear?"

"Oh, heavenly!—yes, I hear. Yes, it would be rather—if you came."

Even though the "phone Burke's voice conveyed something of that unsettling fiery ardour of his, "I won't come—unless you promise to behave," said Jean warningly.

Bubbling over with pleasure at the prospect unfolded by the invitation, she found it a little difficult to infuse a befitting sternness into her tones.

"Do I need to take fresh vows?" came back Burke's answer, spoken rather gravely. "I made you a promise that day—when we drove back from Dartmoor. I'll keep that."

"I'll never kiss you again till you give me your lips yourself."

The words of the promise rushed vividly into Jean's mind, and now that steady voice through the 'phone uttering its quiet endorsement of the assurance given, made her feel suddenly ashamed of her suspicions.

"Very well, I'll come to you," she said hastily. "How shall I get you?"

"It's all planned, because we thought—at least we hoped—you'd come. If you'll come down to Oxshott by the three o'clock train from Coombe Exe, I'll meet you there with the car and drive you up to the bungalow. Judy is going to drive into Newton Abbot early, to do some marketing, and afterwards she'll lunch with her London people—the Hofords. Then they'll all come up together in the afternoon."

(To Be Continued.)

Province Of A Newspaper

Is To Report Actual Happenings Without Any Prejudice

It would be comical, were it not somewhat pathetic, the way newspaper offices are besieged by their friends, urging them to "report" this and that; to "use to it" that and that; to correct; to have this that done in the city or county. These friends actually appear to believe that it is the newspaper's business to handle all these affairs.

But a self-respecting newspaper, though ready and willing to carry all reasonable responsibility, must mind its readers that they too have a responsibility.

A self-respecting newspaper tries to report the news of what actually happens, not what it might wish had happened. The relation of a self-respecting newspaper to the general public is not always understood. It is the duty of a newspaper to be in position to support any good act and criticize any bad act of public policy.

This relationship cannot exist where favors are asked and granted. Honesty is the only policy for a newspaper.

If objectors don't like the way things are going, they should qualify as voters, and then raise Cain about it.—Kitchener Record.

Demand For Binder Twine

Eastern Factory To Increase Plant Capacity By 20 Per Cent.

Anticipating increased demand for binder twine due to a predicted heavy wheat crop this year in Canada, the Plymouth Cordage Company of Wexford, has installed new machinery to increase plant capacity by 20 per cent, and started a night shift. Employment for 200 additional men will be given.

New Construction Brick

A new construction brick, having a high fusion point and almost no shrinkage, has been perfected. Material used for the brick was Georgia kaolin, a pure form of white clay.

Overcoming Danger Of Lightning To Airplanes

Process Known As "Bonding" Has Been Proved Effective

British aeronautical engineers have succeeded in overcoming danger to aircraft and passengers from lightning to such an extent that a plane may be struck while in flight and remain safely undamaged to continue its journey.

A process known as "bonding" in which all metal parts of the machine are connected into a continuous conductor prevent heavy charges of static electricity, such as are picked up in storm clouds, from blowing the plane apart.

"Horatius," an Imperial Airways liner, was recently struck by lightning while flying over Kent on her way to Paris. Although some of the windows were blown out, no occupant was hurt and the pilot was able to turn back to London and transfer his passengers to another plane which took them at once to their destination.

Hint For The Cook

Expert Says "Pinch" Should Be Weighed For Best Results

Many a tasty dish would be just a little tastier, and many a sad stew would be just a little less sad if cooks would make some effort to standardize their "pinch," said Max Werder, assistant victualling superintendent of the Canadian National Steamships, in a recent issue of hints to housewives. Mr. Werder advises all cooks to measure their fingers and weigh their "pinch" capacity so that a "pinch of salt" or a "small pinch of cayenne pepper" will become terms with some meaning.

He says the former amount should be a quarter of an ounce and the latter a sixteenth of an ounce.

Silk Hat Trade Declining

Demand Falling Off and No Apprentices Being Trained

Denton, the little Lancashire town, famed for manufacture of silk hats, fears that the trade is doomed.

No apprentices are being encouraged to enter this particular branch of the hat manufacturing business, and all workmen at present employed are skilled craftsmen, who are getting on in years.

The world demand for silk hats is said to have fallen to about six dozen a week, most of which are manufactured in Denton.

The Line Is Busy

But Chinese Have Most Polite Way Of Saying So

In China, when a subscriber rings up the telephone exchange the operator asks: "What number does the honorable son of the moon and stars desire?" After a short silence the exchange resumes, "Will the honorable person graciously forgive the inadequacy of the insignificant service and permit this humble slave of the wire to inform him that the never-to-be-sufficiently censured line is engaged?"

Stockyards For The Pas

Cattle shipped over the Hudson Bay Railway for export through the port of Churchill will be fed and watered at The Pas, it has been definitely learned. Construction of stockyards will begin here at once.

At least one cattle shipment will be made to Great Britain over the northern route this year.

Terribly Inconscient

According to an official, says London Punch, the offices of income-tax collectors are so scantily furnished that it isn't possible to ask taxpayers to take a seat. Nor is there any accommodation for those who faint.

Tired All Day Long

Mother and Daughter Both Praise Dr. Williams' Pink Pills For Restoring Vigor

"Being rundown, I was not able to do my work; I had no ambition, and could not sleep at night," writes Mrs. Reuben Ament, Grafton, Ont. "I saw an advertisement for Dr. Williams' Pink Pills. Trying two boxes, I got relief right away; so I kept on taking the Pills, and now I am able to do my work with pleasure, and I have no ailments whatever."

Mrs. Ament adds: "My daughter was also rundown. Every one thought she was going into a decline. I gave her Dr. Williams' Pink Pills, and I could see success immediately. Don't allow yourself or your daughter to be robbed of health and vigor. Take Dr. Williams' Pink Pills. They banish rundown or nervous conditions, and restore the normal blood cells, which impart health and vitality. Get a supply at your druggists; in the new glass container—50c.

Improvement Came Quickly

Financial Responsibility Insurance Legislation Soon Effective In B.C.

British Columbia's new automobile insurance legislation, passed at the last session of the legislature, will come into effect September 1, it was announced following a session of the cabinet when an order-in-council was passed fixing the date in conformity with Ontario and other provinces in the Dominion having similar legislation. The new legislation is known as financial responsibility insurance, and the object is to eliminate from the streets and highways irresponsible drivers of motor vehicles.

A Real Sport

It happened in front of the Palace. Two lay-offs were chewing the rag. "What're you doin' tonight?" asked one. "How about takin' in a movie? It'll take our minds off the depression."

"Sorry, old man," was the answer. "But I can't make it. I've got a bridge date."

"That's okay, too," was the amazing retort. "I'll jump off with you."

To Keep Slender You Must Be Clean Inwardly

Let ENO keep you well regulated and you will have the normal, slender body nature intended for you. ENO'S "Fruit Salt" will keep the body normal by ridding the intestinal tract of poisonous waste matter. Be ENO conscious. ENO is the safe, sure way to normal health—and slenderness.

ENO'S FRUIT SALT

Punctuality Is Amazing

Birds and Fish Seem To Have Extraordinary Time Sense

Some birds certainly have a sense of time. Observations made at Barton Abbey, England, in the month of June prove that the lark is definitely the first to sing in the morning. This at two minutes after three. Next comes the thrush, third the song warbler, fourth the blackbird. Then in order the reed bunting, robin, cuckoo, willow-wren, rook and garden warbler. The whole list is too long to give, but the same order was kept faithfully, morning after morning, ending with the tree creeper which did not sound its note until four thirty-seven.

Great shoals of a delicious little fish arrive yearly-off the coasts of Samoa on the same day in the same month, with such regularity that, from time to time out of mind, the day has been set apart by the natives as a holiday and a feast day. The shoals take twenty-four hours in passing, then they are not seen again until the same day the following year. There is no explanation of the amazing punctuality of their yearly visit.

Little Helps For This Week

"Great peace have they which love Thy law."—Psalm cxix. 165.

Dear Lord and God, incline Thine ear unto my call; O grant me that in all, This will of mine May still be one with Thine!

Teach me to answer still, What'er my lot may be, To all Thou sendest me Of good or ill, All goeth as God will.

—Alice Williams

The root of all dissatisfaction and discontent with self, and with one's surroundings, and with one's prospects, can never be reached until we go down to the will of God in our soul's birth and soul's mission, and make the discovery of that will for us, and the doing it our chief aim and hope. No change in life's circumstances, no larger work, no happier outlook will be enough. We ourselves need to be born again; it is not our outward life that needs to be refashioned.—Newman Smyth.

Knew Surgical Technique

First evidence that prehistoric natives of British Columbia knew the surgical technique of trephining—cutting a piece of bone out of the skull—was found recently when a skull bearing marks of this operation was unearthed.

Peanut shells as material for cellulose are favorably reported upon, after experiments.

THE RHYMING OPTIMIST

By Aline Michaels

HEART OF GOLD

Life is a flower with a golden heart; Though petals after petals drop away As one by one the swift-winged years depart, Still something of its charm and fragrance stay.

As ever wider open falls the rose, Still heavier, more potent grows its fragrance; And rare, new loveliness the hours disclose, Surpassing speech, yet strangely eloquent.

A flower is life; yet, as youth's petals fall, And flying years reach out with eager hands, Time is defrauded; he cannot take all. But only graces valued overmuch; For not until the final leaves uncurl Does it reveal its matchless heart of gold.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

New Motor Law

Financial Responsibility Insurance Legislation Soon Effective In B.C.

British Columbia's new automobile insurance legislation, passed at the last session of the legislature, will come into effect September 1, it was announced following a session of the cabinet when an order-in-council was passed fixing the date in conformity with Ontario and other provinces in the Dominion having similar legislation. The new legislation is known as financial responsibility insurance, and the object is to eliminate from the streets and highways irresponsible drivers of motor vehicles.

MINARD'S LINIMENT

"KING OF PAIN"

W. N. U. 1950

Main Street

Mr. and Mrs. Ross McFarland, motored to the City the first of the week. Two cars of stock were shipped from Irma this week.

Mr. A. C. Carbol delivered two new Ford Cars Saturday, one at Kinsella and one near Viking.

Mr. and Mrs. Ross Archibald, of Peace River visited at his uncle's, Mr. and Mrs. J. H. Archibald, this week. Born to Mr. and Mrs. W. Fry of Fabyan, at Wainwright hospital, Friday, July 22nd, a son.

Mr. Pryce Jones and family have been spending the vacation at Hayter and other Alberta points.

Miss B. Mathison, of Calgary is visiting friends and relatives at Irma and Hardisty.

Seventeen Irma boys accompanied by Mr. A. Gamble, left Tuesday morning to attend camp at Camp Lake, North West of Kinsella.

Mr. Archie Skiles, of Edmonton, has been spending his vacation with his father at Irma and renewing acquaintances in the Irma district.

Mr. and Mrs. J. H. Archibald, Mr. and Mrs. A. C. Archibald, and Mr. Bryce Innis spent the week end in the city.

Mr. and Mrs. Darrel Peterson and family of Peace River are spending their vacation at Irma. Mr. Peterson has been teaching school in the north country.

Mr. H. Knudson and daughter, Mrs. J. Erickson, left Wednesday for a trip to Vancouver and other Pacific Coast points.

Neill McMillan son of Mr. and Mrs. Mack McMillan fell over a box while playing Friday night and broke one of his legs. He was taken to Wainwright for hospital treatment.

Mr. and Mrs. L. B. King accompanied by their daughters Mary and Mildred, motored to Edmonton Sunday, returning Monday. The Misses Victoria and Bessie Vickers accompanied them to Irma to spend a short vacation.

Mr. C. C. King of Regina accompanied by his daughter Margaret and son Earl have been renewing acquaintances in the Irma and Fabyan districts for the past week. Mr. King reports having had some very hot dry weather around Regina again this summer.

The Irma District School Fair will be held on the 17th of September.

1932. There are 11 schools joined up: Batta, Ross, Alma Mater, Albert, Edmonton Point, two rooms at Irma, Glenholm, Strawberry Plains, Coal Springs and Silver Lane. All teachers, scholars and Directors should work to make our fair the success it was last year. Any information regarding the fair will be gladly given by the School of Agriculture, S. C. Heckbert, Vermilion, or A. E. Peterson, Secretary, Irma.

BABY PROSSER
The funeral of the infant daughter of Mr. and Mrs. Melvin Prosser was held from the United Church, Irma on July 21st. Little Lorna was on 7 days old but had endeared herself to her parents so that her loss is keenly felt.

The Community sympathizes with the sorrowing relatives.

"Rest little blossom, no sorrow can reach you
White as the snow and the lily so pure;
Yet you have left in this world two who love you,
Earth's sad remembrance so long to endure.

Angels we know by the little hand lead you,
Ours is the heartache that's so hard to bear,
But our aim will be our lives to live ever
That we may when our time comes meet you up there."

Contributed

CARD OF THANKS
We wish to thank most sincerely our kind friends and neighbors who so kindly assisted us and expressed their sympathy in the loss of our infant daughter, Lorna.

Mr. and Mrs. Melvin Prosser.

The Women's Institute held a very successful and pleasant afternoon when they entertained ten Grandmothers and 39 visitors altogether from Kinsella and Heath.

The next meeting will be held at Mrs. Thurston's first Thursday in August.

Roll call will be answered by favorite Summer Salads.

Mrs. Beaumont who has been visiting her brother and sister, Mr. and Mrs. Bert Long, returned to Red Deer. Miss Olive Beaumont is staying for a few weeks.

THE INFLUENCE OF WEATHER ON THE SPREAD OF STEM RUST

A question frequently asked in Western Canada at this time of year is "will stem rust be bad?" Unfortunately this is a question which no one can answer in advance, as no one can predict what the weather conditions will be during the remainder of the growing season. A few observations on the influence of weather conditions on rust development may help those interested in cereal production to judge as the season progresses, what the possibilities are of damage from stem rust. Studies carried on at the Dominion Rust Research Laboratory, Winnipeg, have shown pretty clearly that the bulk at least of the early rust infections are caused by wind borne spores from the south.

South wind, then, during June and July may be looked upon as an indication that an abundance of spores will be present in the air over Western Canada to cause infection. But the presence of spores in the air is not sufficient. Weather conditions must be favorable for the germination of these spores and for the development of the fungus in the growing plants. A film of moisture must be present on the plants for several hours in order that the spores can germinate and their germ-tubes enter the breathing pores of the plants. Rust spores germinate better at a moderately low temperature than at a high temperature, and as the moisture does not dry off the plants so rapidly when the air is cool, damp cool days or nights are favourable for infection. On the other hand, the fungus grows more rapidly in the tissues of the plants in bright sunshine. Nights with heavy dew followed by sunny days, or showery weather with intervals of bright sunshine furnish almost ideal rust weather. Continuous high temperatures, however, cause early ripening of the crops, so that the period in which rust can produce spores is shortened and hence fewer spores are available to produce new infections. Besides, the more quickly the crops ripen, the shorter is the time they are subject to infection. Dry cool weather is unfavorable for rust.

B. Peterson, Dominion Rust Research Laboratory, Winnipeg, Man.

The Wastebasket

Van—How is your friend who writes the daily forecasts for the newspapers?
You—He isn't looking well lately. The weather hasn't been agreeing with him.

"How did they treat you in Scotland?"
"Reluctantly."

The farmer's pink checked daughter was coming up the lane. She was clad in grimy overalls, from the pockets of which bulged bunches of waste and sundry wrenches and pliers. In her hand was a dirty satchel of iron tools.

"Where are you going, my pretty maid?"
"I'm going a-milking, sir," she said.

"But why the tools, my pretty maid?"
"Trouble," she said, "with that blamed milking machine again."

Diner—The man who killed this chicken had a kind heart.
Waiter—What makes you think that, sir?

Diner—Well, he must have hesitated five or six years before doing it.

Pretty Shop Girl: "Could I interest you in a bathing costume, sir?"
Mr. Gay: "You certainly could, baby, but my wife is over there at the glove counter."

Jones' wife thinks the world of her husband.
"Does she?"
"Yes; she even believes that the parrot taught him to swear."

"So that new girl of yours is lazy?"
"Lazy! Why, the other morning, I caught her putting popcorn into the pancakes to make them turn over themselves."

Teacher: "Now, Mary can you tell me to which family the gorilla belongs?"
Mary: "No, miss, we have only lived in our flat a month and do not know the neighbors."

He: "What a night, what a girl, what a moon—what a combination."
She: "Heavens, is that showing, too?"

Judge (sternly): Well, what's your excuse for speeding 60 miles an hour?
Victim: I had just heard that the ladies of my wife's church were giving a rummage sale, and I was hurrying home to save my other pair of trousers.

Judge: Case dismissed.
What is a pedestrian, daddy?
It is a person with a wife, daughter, two sons, and a car.

George: Why hasn't daddy got much hair?
Mother: Because he thinks a lot, dear.

"George: Then why have you got so much mother?"
Mother (pause): Go on with your breakfast.

"Well, darling, I've had my life insured for \$2,000.00" said a young married man here to his wife. "Thank goodness," she replied, "now I shall have to be telling you to be so careful every place you go."

Heard at the ladies social: "Let's see, whom were we discussing?" "I forgot. Who went out last?"

"You are not like Mr. _____," complained a local lady to her husband last week. "They have been married 20 years and his wife says he is so tender." "Tender? Well, he ought to be after being kept in hot water that long," he replied.

"Hello," called a voice over the phone at the poker club, "is my husband there?" "No, ma'am," replied one of the members, "he's not here."

"But I haven't told you who I am," the woman insisted. "I know, ma'am, but nobody's husband ain't ever here," he replied.

A Power in the Lodge
Boss—Rufus, did you go to your lodge meeting last night?
Rufus—Nah, sub. We don't have to postpone it.

Boss—How was that?
Rufus—De Grand All-Powerful Inevitable Most Supreme Unconquerable Potentate dun got beat up by his wife.

Heard at the neighbor's breakfast table: "You were a different man when I married you." "I hope so, for then I must have been a fool."

One way to avoid spending money foolishly, says a deep student of economy, is to not have any.

British Statesmen Relax

The British delegation to the Imperial Economic Conference at Ottawa, headed by Rt. Hon. Stanley Baldwin, Lord President of the Council and former Prime Minister of Great Britain, despite its heavy labors during the five-day voyage to Canada on the Canadian Pacific liner "Empress of Britain" had its lighter moments. The scenes above show members of the delegation visiting the Navigating Bridge of the big white flagship, and Rt. Hon. J. H. Thomas, Dominion Secretary, enjoying a game of quoits. Rt. Hon. Stanley Baldwin autographs a picture of the "Empress of Britain" for Captain Latta, her commander; looking on is Geoffrey Lloyd, M.P., a brilliant younger member of the House, who is his Parliamentary Private Secretary. Lower picture shows: Rt. Hon. Sir Philip Cunliffe-Lieber, Lord Haldane, and Sir John Gilmour, receiving a short lesson in navigation from Capt. R. G. Latta. While the delegates were on the bridge a small steamer showed a message of welcome, and above is seen the "Empress of Britain's" signal "Thank you."
